Editor's Note

From Maryland to Tennessee, Florida to Texas, the architectural traditions of the South come together in this book to provide an excellent array of home-building opportunities. The growing home-building industry in the South, as well as an increased interest in Southern home designs nationally, underscore the popularity and significance of these regional architectural styles. In this collection, fanciful Southern Colonials capture the imagination of those interested in making new histories, while sunny Floridians satisfy the beachcomber. Punctuated with adaptations such as Jefferson's Poplar Forest home and Louisiana's Rosedown House, variety is the only constant. A turn of the page starts you on the road to your dream home, Southern style!

About The Designers

The Blue Ribbon Designer Series™ is a collection of books featuring the home plans of a diverse group of outstanding home designers and architects known as the Blue Ribbon Network of Designers. This group of companies is dedicated to creating and marketing the finest possible plans for home construction on a regional and national basis. Each of the companies exhibits superior work and integrity in all phases of the stock-plan business including modern, trendsetting floor planning, a professionally executed blueprint package and a strong sense of service and commitment to the consumer.

Design Basics, Inc.

For nearly a decade, Design Basics, a nationally recognized home design service located in Omaha, has been developing plans for custom home builders. Since 1987, the firm has consistently appeared in *Builder* magazine, the official magazine of the National Association of Home Builders, as the top-selling designer. The company's plans also regularly appear in numerous other shelter magazines such as *Better Homes and Gardens*, *House Beautiful* and *Home Planner*.

Design Traditions

Design Traditions was established by Stephen S. Fuller with the tenets of innovation, quality, originality and uncompromising architectural techniques in traditional and European homes. Especially popular throughout the Southeast, Design Traditions' plans are known for their extensive detail and thoughtful design. They are widely published in such shelter magazines as *Southern Living* magazine and *Better Homes and Gardens*.

Larry E. Belk Designs

Through the years, Larry E. Belk has worked with individuals and builders alike to provide a quality product. After listening to over 4,000 dreams and watching them become reality all across America, Larry's design philosophy today combines traditional exteriors with upscale interiors designed for contemporary lifestyles. Flowing, open spaces and interesting angles define his interiors. Great emphasis is placed on providing views that showcase the natural environment. Dynamic exteriors reflect Larry's extensive home construction experience, painstaking research and talent as a fine artist.

Larry W. Garnett & Associates, Inc.

Starting as a designer of homes for Houston-area residents, Garnett & Associates has been marketing designs nationally for the past ten years. A well-respected design firm, the company's plans are regularly featured in *House Beautiful*, *Country Living*, *Home* and *Professional Builder*. Numerous accolades, including several from the Texas Institute of Building Design and the American Institute of Building Design, have been awarded to the company for excellence in architecture.

Home Planners, Inc.

Headquartered in Tucson, Arizona, with additional offices in Detroit, Home Planners is one of the longest-running and most successful home design firms in the United States. With over 2,500 designs in its portfolio, the company provides a wide range of styles, sizes and types of homes for the residential builder. All of Home Planners' designs are created with the care and professional expertise that fifty years of experience in the home-planning business affords. Their homes are designed to be built, lived in and enjoyed for years to come.

Donald A. Gardner, Architects, Inc.

The South Carolina firm of Donald A. Gardner was established in response to a growing demand for residential designs that reflect constantly changing lifestyles. The company's specialty is providing homes with refined, custom-style details and unique features such as passive-solar designs and open floor plans. Computer-aided design and drafting technology resulting in trouble-free construction documents places the firm at the leading edge of the home plan industry.

The Sater Group, Inc.

The Sater Group, Inc. has a long established tradition of providing South Florida's most diverse and extraordinary custom designed homes. Their goal is to fulfill each client's particular need for an exciting approach to design by merging creative vision with elements that satisfy a desire for a distinctive lifestyle. This philosophy is proven, as exemplified by over 50 national design awards, numerous magazine features and, most important, satisfied clients. The result is an elegant statement of lasting beauty and value.

Southern Farmhouses

With its porches and unpretentious warmth, the farmhouse lends itself well to Southern lifestyles. Where rains could prevent opening windows to coax breezes indoors, the Southern Farmhouse features wrapping porches to provide protection and the perfect spot for that favorite rocking chair or porch swing. This “high and dry” characteristic is extended to the actual foundation of the house, which is often raised off wet and soggy ground. And such additions as a rear deck with a spa add not only an air of modernism, but fit well with the outdoor sensibilities present in such a temperate climate. Abundant woodlands lend themselves to the building of these houses; wood siding, shingles, posts and columns are found on many designs. With 1½ or two stories of livability, central gathering areas and split sleeping arrangements characterize the comfort inherent in these designs.

In Design EE9623, the covered porch extends almost all the way around the house. Further earmarking this house as a fine example of Southern Farmhouse design is its wood siding, dormer windows and tall chimney stacks.

As a true testament to the variety of influences in Southern architecture, Design EE9087 stands out as exemplary. Proportioned to 1½ stories and adorned with a wrap-around porch and two secondary porches, this house utilizes brick for its exterior and adds to its appeal with well-defined columns supporting the roof overhang that creates the porches.

With a variety of designs from which to choose, this section on Southern Farmhouses offers a wealth of fine home-building opportunities.

Design EE9621

First Floor: 1,325 square feet

Second Floor: 453 square feet

Total: 1,778 square feet

● For the economy-minded family, this compact design has all the amenities available in larger plans with little wasted space. In addition, a front Palladian window, dormers and rear arched windows provide exciting visual elements to the exterior. The spacious great room has a fireplace, a cathedral ceiling and clerestory windows. A second-level balcony overlooks this gathering area. The kitchen is centrally located for maximum flexibility in layout and features a pass-through to the great room. Besides the generous master suite with its well appointed full bath, there are two family bedrooms located on the second level sharing a full bath with a double vanity. Please specify basement or crawlspace foundation when ordering.

Architects, Inc.

● A wraparound covered porch at the front and sides of this house and an open deck at the back provide plenty of outside living area. The spacious great room features a fireplace, cathedral ceiling, and clerestory with an arched window. The first-floor master bedroom contains a generous closet and a master bath with garden tub, double-bowl vanity, and shower. The second floor sports two bedrooms and a full bath with double-bowl vanity. This plan includes a crawl-space foundation.

Design EE9623

First Floor: 1,651 square feet
Second Floor: 567 square feet
Total: 2,218 square feet

● A wonderful wraparound covered porch at the front and sides of this house and the open deck with a spa at the back provide plenty of outside living area. Inside, the spacious great room has a fireplace, a cathedral ceiling and a clerestory with an arched window. The kitchen is centrally located for maximum flexibility in layout and has a food preparation island for convenience. Besides the master bedroom and its access to the sun room, there are two second-level bedrooms that share a full bath. Please specify basement or crawlspace foundation when ordering.

Design EE9616

First Floor: 1,734 square feet
Second Floor: 958 square feet
Total: 2,692 square feet

● A wraparound covered porch at the front and sides of this home and the open deck with spa and seating provide plenty of outside living area. A central great room features a vaulted ceiling, fireplace and clerestory windows above. The loft/study on the second floor overlooks this gathering area. Besides a formal dining room, kitchen, breakfast room and sun room on the first floor, there is also a generous master suite with garden tub. Three second-floor bedrooms complete sleeping accommodations. The plan includes a crawl-space foundation.

Design EE9004

First Floor: 2,166 square feet

Second Floor: 1,169 square feet

Total: 3,335 square feet

● This farmhouse design, with its expansive wraparound porch and spacious interior, will suit the needs of any large, active family. The foyer opens directly to the formal living room with an elegant fireplace. The family room offers a unique brick wall with built-in fireplace and a French door opening onto a covered porch. The well-planned kitchen overlooks a breakfast area with full-length windows that allow an uninterrupted view of the rear yard. The large utility room, with plenty of storage space, leads to an attached two-car garage. The master bedroom has access to a private study with built-in bookshelves. A third fireplace further enhances the master area. His and Hers walk-in closets, along with a garden tub and glass-enclosed shower, complete this secluded master suite. Upstairs, three bedrooms and two baths offer plenty of space and convenience for the children. A game room with an alcove that is perfect for exercise equipment provides a versatile family activity area.

Total: 2,776 square feet

● Rustic charm abounds in this pleasant farmhouse rendition. Covered porches to the front and rear enclose living potential for the whole family. Flanking the entrance foyer are the living and dining rooms. To the rear is the L-shaped kitchen with island cook top and snack bar. A small family room/breakfast nook is attached. A private study is tucked away on this floor next to the master suite. On the second floor are three bedrooms and a full bath. Two of the bedrooms have charming dormer windows.

Design EE2776

First Floor: 1,134 square feet
Second Floor: 874 square feet
Total: 2,008 square feet

The second floor houses all of the sleeping facilities. There is a master bedroom with a private bath and a walk-in closet. Two other bedrooms share a bath. This is an excellent one-and-a-half-story design. For information on customizing this design, call 1-800-521-6797, ext. 800.

Design EE9290

First Floor: 1,322 square feet
Second Floor: 1,272 square feet
Total: 2,594 square feet

● Here's the luxury you've been looking for—from the wraparound covered front porch to the bright sun room at the rear off the breakfast room. A sunken family room with fireplace serves everyday casual gatherings, while the more formal living and dining rooms are reserved for special entertaining situations. The kitchen has a central island with snack bar and is located most conveniently for serving and cleaning up. Upstairs are four bedrooms, one a lovely master suite with French doors into the master bath and a whirlpool tub in a dramatic bay window. A double vanity in the shared bath easily serves the three family bedrooms.

● Oval windows and an appealing covered porch lend character to this 1½-story home. Inside, a volume entry views the formal living and dining rooms. Three large windows and a raised-hearth fireplace flanked by bookcases highlight a volume great room. An island kitchen with huge pantry and two Lazy Susans serves a captivating gazebo dinette. In the master suite, a cathedral ceiling, corner whirlpool and roomy dressing area deserve careful study. A gallery wall for displaying family mementos and prized heirlooms graces the upstairs corridor. Each secondary bedroom has convenient access to the bathrooms. This home's charm and blend of popular amenities will fit your lifestyle.

● Bright windows and a wraparound porch enhance the elevation of this four-bedroom, 1½-story home. Formal living and dining rooms are surveyed from the entry. A flush-hearth fireplace and transom windows highlight a volume great room planned for daily living. In the hearth room, catch a glimpse of the decorative fireplace and the convenient access to the front porch. Nearby, a sunny bayed dinette is served by an island kitchen with snack bar and two pantries. The main-floor master bedroom features a 10-foot ceiling and window seat. In the master bath, an oval whirlpool, dual vanities and walk-in closet pamper the homeowners. Upstairs, each secondary bedroom has a walk-in closet. Bedroom 3 has a private bath while Bedrooms 2 and 4 share a Hollywood bath. At 3,294 square feet, this prairie farmhouse adds distinction to any location.

Design EE2774

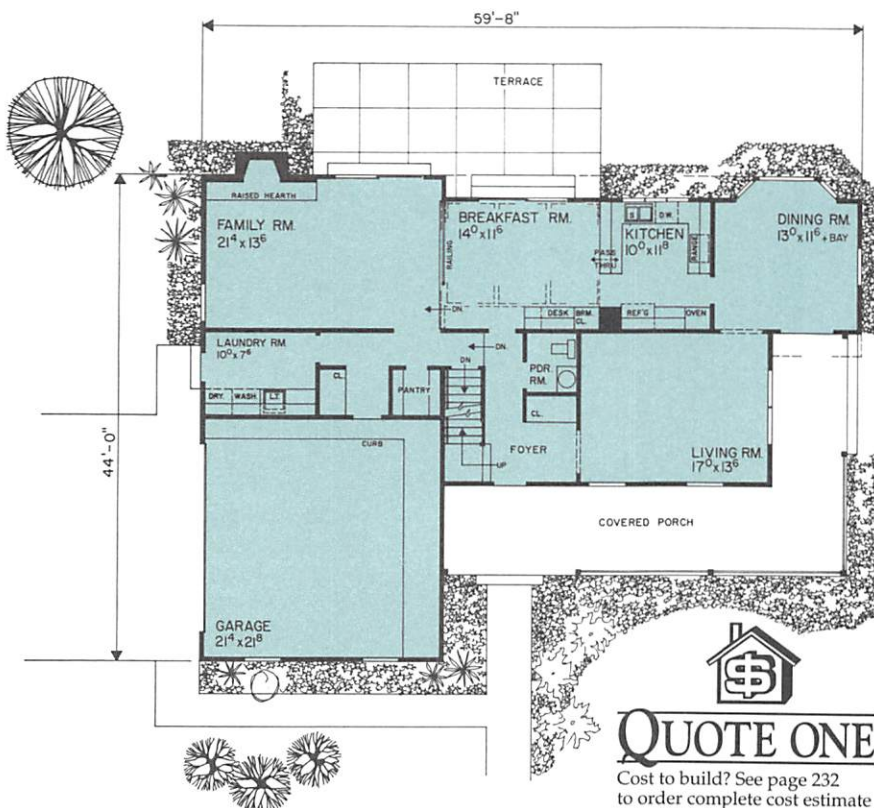

First Floor: 1,366 square feet

Second Floor: 969 square feet

Total: 2,335 square feet

● Here's a popular farmhouse adaptation with all the most up-to-date features. Beginning with the formal areas, this design offers pleasures for the entire family. There is the quiet corner living room which has an opening to the sizable dining room. This room will enjoy plenty of natural light from the delightful bay window overlooking the rear yard. It is also conveniently located with the efficient U-shaped kitchen just a step away. The kitchen features many built-ins with a pass-through to the beamed ceiling breakfast room. Sliding glass doors to the terrace are fine attractions in both the sunken family room and breakfast room. The service entrance to the garage is flanked by a clothes closet and a large, walk-in pantry. There is a secondary entrance through the laundry room. Recreational activities and hobbies can be pursued in the basement area. Four bedrooms and two baths are upstairs. For information on customizing this design, call 1-800-521-6797, ext. 800.

● This Early American farmhouse offers plenty of modern comfort with its covered front porch with pillars and rails, double chimneys, a building attachment and four upstairs bedrooms. The first-floor attachment includes a family room with a bay window. It leads from the main house to a two-car garage. The family room certainly is the central focus of this fine design. It has its own fireplace and a rear entrance to a laundry and sewing room behind the garage. Disappearing stairs in the building attachment lead to attic space over the garage. The upstairs also is accessible from stairs just off the front foyer. Included is a master bedroom suite. Downstairs, a modern kitchen with a breakfast room, a dining room and a front living room all offer lots of livability. For information on customizing this design, call 1-800-521-6797, ext. 800.

● Here's a traditional design that's made for down-home hospitality, the pleasures of casual conversation and the good grace of pleasant company. The star attractions are the large covered porch and terrace—perfect for family gatherings. Inside, the design is truly a hard worker. Separate living

and family rooms—each with a fireplace—a formal dining room, a large kitchen and breakfast area with bay windows, a separate study, a workshop with plenty of room to maneuver, a mud room and four bedrooms all define the livability of this home. Not to be overlooked are the curio

niches, the powder room, the built-in bookshelves, the kitchen pass-through, the pantry, the planning desk, the workbench and the stairs to the basement. For information on customizing this design, call 1-800-521-6797, ext. 800.

● This home features a dramatic brick and stucco exterior accented by a gabled roof line and artful half-timbering. Inside, the foyer opens to the formal living room accented with a vaulted ceiling and a boxed-bay window. The dining room flows directly off the living room and features its own angled bay window. Through the double doors lies the center of family activity. An entire wall of glass, accented by a central fireplace, spans from the family room through to the breakfast area and kitchen. For your guests, a bedroom and bath are located on the main level. The second floor provides two additional bedrooms and a bath for children. The master suite—with its tray ceiling, fireplace and private study—is a true retreat. This home is designed with a basement foundation.

● This three-bedroom, country home with front and rear porches offers an open plan layout with minimal wasted space. A front Palladian window dormer and a rear arched window along with the overall massing of the home adds to its exterior visual intrigue. The entrance foyer rises with a sloped ceiling and enjoys an abundance of light from a

Palladian window clerestory. In the spacious great room, a fireplace, a cathedral ceiling and a clerestory with an arched window all add to appeal. A second-level balcony overlooks the great room. The master suite features all of the amenities while two secondary bedrooms reside on the second level. A bonus room offers room to grow.

Design EE9645

First Floor: 1,356 square feet
Second Floor: 542 square feet
Total: 1,898 square feet

● The welcoming charm of this country farmhouse is expressed by its many windows and its covered, wraparound porch. A two-story entrance foyer is enhanced by a Palladian window in a clerestory dormer above to allow natural lighting. A first-floor master suite allows privacy and accessibility. The master bath includes a whirlpool tub, a shower and a double-bowl vanity along with a walk-in closet. The first floor features a nine-foot ceiling throughout with the exception of the kitchen area which features an eight-foot ceiling. The second floor provides two additional bedrooms, a full bath and plenty of storage space. An unfinished basement and bonus room provide room to grow. Please specify basement or crawlspace foundation when ordering.

Design EE9851 First Floor: 2,210 square feet
Second Floor: 1,070 square feet; Total: 3,280 square feet

● A generous front porch enhances the living area of this home with its sheltering welcome and Americana detailing. The classic style is also echoed in the use of wood siding, shuttered windows and stone finish work on two chimneys. The main level begins with a two-story foyer with a tray ceiling. Double doors open into the study with an exposed beam ceiling and fireplace. Left of the

foyer lies the dining room drenched in natural sunlight. Across the hall, the great room with a fireplace, a wet bar and two sets of French doors provides a great gathering place. The master suite is located at the end of the main hallway. It features a tray ceiling and a complete master bath with a separate shower, a water closet and dual vanities. The large walk-in closet completes the suite. The two-car garage is at the rear of the home, with convenient access from the expansive kitchen and breakfast area. Staircases from the great room and foyer lead to the upper level. Two additional bedrooms, each with a walk-in closet and a vanity, share the tub area. A third bedroom has a generous walk-in closet and a private bath. This home is designed with a basement foundation.

Design by
Design Traditions

Southern Country Designs

Supporting many of the same attributes of the Southern Farmhouse, the Southern Country house lends itself to slightly different interpretations. In some instances, it takes on a much more ground-hugging, unassuming appearance, due in large part to not having to be raised above wet farmlands. With clapboard siding, as well as a prominent chimney, these homes are much more likely to conform to a rolling landscape, not unlike a ranch house does. The first designs in this section — such as EE9622 — display these endearing qualities along with expansive decks or terraces for enjoying prime weather. Front porches still offer home owners the opportunity to sit, relax and chat with neighbors.

Because the need for utility, once so prevalent on working farms, is gone, Southern Country designs veer from farmhouse designs with a tendency to more closely mirror the fancies of city dwellers. Thus, elements of other styles often show up with more prominence. Gothic columns, Palladian windows, French doors and Greek Revival detailing all provide desirable effects. Exterior materials also give way to variations, with more houses sporting combinations of brick and stucco. This is exemplified in Design EE8039 where a columned porch with arches, a brick and stucco exterior, quoins, a sloping roof and multi-pane windows work in chorus to present a charming country home.

Tackling livability issues without any problems, Design EE9822 greets visitors with true Southern hospitality. A sheltering front porch — note the use of columns here — provides the first indication of a welcoming interior. Pedimented gables and wood siding combine to form interesting planes; wood shingles highlight sweeping roof lines while dormer windows offer additional dimension to this pleasing facade.

Whatever your fancy, the many designs in this section all provide the very best in country livability.

Design EE9619

Square Footage: 2,021

● Multi-pane windows, shutters, dormers, bay windows and a delightful covered porch grace the facade of this country cottage. Inside, the floor plan is no less appealing. Note that the great room has a fireplace, a cathedral ceiling and sliding glass doors with an arched window above to allow for natural illumination of the room. A sun room with a hot tub leads to an adjacent deck. This space can also be reached from the master bath. The generous master bedroom has a walk-in closet and a spacious bath with a double-bowl vanity, a shower and a garden tub. Two additional bedrooms are located at the other end of the house for privacy. The garage is connected to the house by a breezeway. Please specify basement or crawl-space foundation when ordering.

FRONT

FRONT

Design EE9622

Square Footage: 1,782

● What visual excitement is created in this country ranch with the combined use of exterior building materials and shapes! The angular nature of the plan allows for flexibility in design—lengthen the great room or family room, or both, to suit individual space needs. Notice the cathedral ceilings in both rooms and the fireplace in the great room. An amenity-filled master bedroom features a cathedral ceiling, a private deck and a master bath with a whirlpool tub. Two other bedrooms share a full bath. An expansive deck area with a hot tub wraps around interior family gathering areas for enhanced outdoor living. Please specify basement or crawlspace foundation when ordering.

Design EE9679

Square Footage: 1,512

● A multi-pane bay window, dormers, a cupola, a covered porch and a variety of building materials all combine to dress up this intriguing country cottage. The generous entry foyer leads to a formal dining room and an impressive great room with a cathedral ceiling and a fireplace. The kitchen includes a breakfast area with a bay window overlooking the deck. The great room and master bedroom also access the deck. The master bath has a double-bowl vanity, a shower and a garden tub. Two additional bedrooms are located at the front of the house for privacy and share a full bath.

● Covered porches front and rear will be the envy of the neighborhood when this house is built. The interior plan meets family needs perfectly in well-zoned areas: a sleeping wing

with four bedrooms and two baths, a living zone with formal and informal gathering space, and a work zone with U-shaped kitchen and laundry with washroom. The master bedroom

with deluxe bath, including His and Hers walk-in closets, is noteworthy. Open planning and fireplaces enhance the living areas. Extra storage space is provided in the two-car garage.

● This engaging three-bedroom split plan promotes casual living both inside and out, offering contemporary amenities for convenient living. The foyer opens to the formal dining room on the right, and straight ahead, the great room complete with a fireplace and a built-in entertainment center. Double French doors unfold onto

a large veranda. The kitchen includes a large walk-in pantry, an eating bar and a bayed breakfast nook. The relaxing master suite enjoys access to a screened porch, His and Hers walk-in closets and a private bath with a glass-enclosed shower. Two secondary bedrooms offer privacy and plenty of storage.

Design EE3461

Second Floor: 611 square feet
Total: 2,002 square feet

● A Palladian window set in a dormer provides a nice introduction to this 1½-story country home. The two-story foyer draws on natural light and a pair of columns to set a comfortable, yet elegant mood. The living room, to the left, presents a grand space for entertaining. From full-course dinners to family suppers, the dining room will serve its purpose well. The kitchen delights with an island work station and openness to the keeping room. Here, a raised-hearth fireplace provides added comfort. Sleeping accommodations are comprised of four bedrooms, one a first-floor master suite. With a luxurious private bath, including dual lavatories, this room will surely be a favorite retreat. Upstairs, three secondary bedrooms meet the needs of the growing family.

● Designed to be a country estate residence, this two-story home combines a sophisticated floor plan with a charming elevation. Throughout the home, beautiful windows bring the outdoors in. From the covered front porch, move inside to view a spectacular two-story entry with curving staircase. French doors lead into the library with a bayed window, built-in desk and bookcases. To the right, note the formal dining room. A great room benefits from the 10-foot spider-beamed ceiling, plus a wet bar and built-in entertainment center. Home owners will relish the combination breakfast/hearth room and kitchen concept. Upstairs, a balcony between the bedrooms overlooks the entry below. Segregation of the secondary bedrooms with walk-in closets provides privacy. Special finishing touches include the formal ceiling and bayed sitting area in the master suite. The master dressing/bath area is enhanced by His and Hers vanities, an oval whirlpool beneath the arched window and a deluxe walk-in closet with windows.

● The appearance of this Early American home brings the past to mind with its wraparound porch, wood siding and flower-box detailing. The uniquely shaped foyer leads to the dining room accented by columns, a vaulted ceiling and a bay window. Columns frame the great room as well, while a ribbon of windows creates a wall of glass at the back of the house from the great room to the breakfast area. The asymmetrical theme continues through the kitchen as it leads back to the hallway, accessing the laundry and two-car garage. Left of the

foyer lies the living room with a warming fireplace. The master suite begins with double doors that open to a large living space with an octagonal tray ceiling and a bay window. The spacious master bath and walk-in closet complete the suite. Stairs to the second level lead from the breakfast area to an open landing overlooking the great room. Three additional bedrooms with large walk-in closets and a variety of bath arrangements complete this level. This home is designed with a basement foundation.

Design EE9822

First Floor: 1,944 square feet
Second Floor: 954 square feet
Total: 2,898 square feet

● This story-and-a-half home combines warm informal materials with a modern livable floor plan to create a true Southern classic. The dining room, study and great room work together to create one large, exciting space. Just beyond the open rail, the breakfast room is lined with windows. Plenty of counter space and storage make the kitchen truly usable. The master suite, with its tray ceiling and decorative wall niche, is a gracious and private owners' retreat. Upstairs, two additional bedrooms each have their own vanity within a shared bath while the third bedroom or guest room has its own bath and a walk-in closet. This home is designed with a basement foundation.

Victorian & Folk Designs

For the South, with its appreciation of the finer things in life, the Victorian Age did not go unnoticed. As a matter of fact, the common denominators of Victorian design — verandas, dormer windows and an extensive use of woodwork — fit into the Southern architectural landscape with little trouble.

In the Victorian age, advances in construction technology and an improved economic climate allowed for homes with intricate detail, complex shapes and a grand nature. Some would say the Victorian Age produced the only true American housing style. In the South, where influences were centuries old and from several countries, this recognition of Victorian design does not pass without significance.

Basic Victorian elements often include asymmetrical forms, steeply pitched roofs and a multitude of decorative detail, and the South readily embraced these elements as it explored such Victorian styles as Second Empire, Italianate and Queen Anne. In the two former, proportions tend toward the vertical; decoration includes carved balusters, repeating columns and intricate window and door surrounds. Design EE9015 reflects some of these features with a facade offset by a gable and curved spindlework that ties together a very charming front porch.

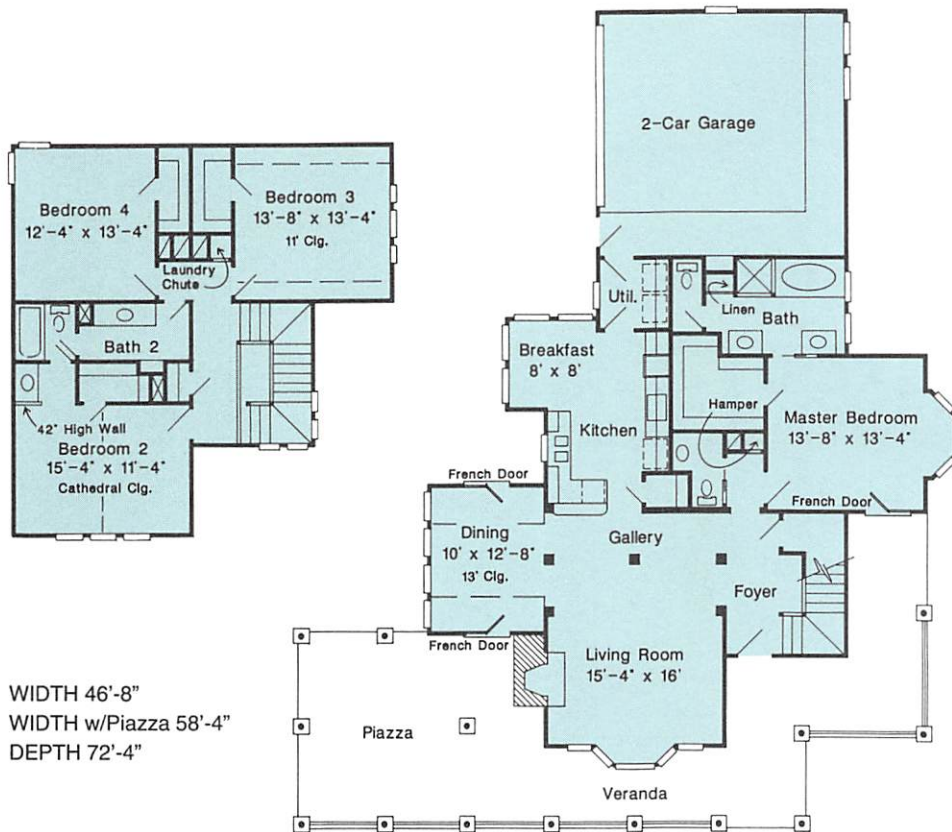

Providing the largest landscape for stylistic innovations, the Queen Anne style features steeply pitch roof lines, oftentimes a front-facing gable and a turret, fan and side lights around doors and a variety of exterior materials. Clapboard is the most common of these and usually combines with shingles, masonry and even terra-cotta. Then, of course, come the spandrels, spindlework, finials and corner brackets to act as icing on the cake.

With considerable proportions and comfortable living patterns, Design EE2953 captures much of the magic of the Queen Anne style. Decorated with covered porches on three sides, this home welcomes all into a fantastic interior.

Folk Victorian traditions also come through in this section with a fine precedent set by Design EE9067. Among its quiet features: a wrapping veranda, a front gable with a Palladian window and chimneys on either side of the house for an additional sense of balance.

No matter what Victorian fancy comes to mind, the designs presented here will undoubtedly make dream homes come true!

● As authentic as the exterior of this design is, the interior offers all the luxury and elegance that today's homeowners could desire. The formal living and dining rooms are separated by detailed wood columns. Built-in bookcases and cabinets highlight the block-paneled study. The centrally located kitchen becomes the focal point of a truly outstanding family living center which includes a sunken media area, breakfast alcove, and a family room with a fireplace. Adjacent to the kitchen is a large hobby room with a built-in desk, a space for a freezer, and generous cabinet storage. A rear staircase provides convenient access to the second floor. The secluded master suite is beyond compare, with such extras as a fireplace with flanking window seats and cabinets, an enormous walk-in closet, and a private deck. The luxurious bath features a dressing table, a whirlpool tub with a gazebo-shaped ceiling above, and an oversized shower. Finally, there is a private exercise room with a bay-window seat. Three additional bedrooms and a laundry room complete the second floor. A staircase leads to an optional third floor area.

First Floor: 1,113 square feet
Second Floor: 965 square feet
Total: 2,078 square feet

● Elegant detail, a charming veranda and the tall brick chimney create a pleasing facade on this four-bedroom Victorian home. Yesterday's simpler lifestyle is reflected throughout this plan. A large bayed parlor with sloped ceiling is visible from the entry. Step down to enter the gathering room with a fireplace and plenty of windows. Note the pantry cabinet and built-in desk in the kitchen and breakfast area. The formal dining room opens to the parlor for entertaining ease. The second-floor master suite is segregated for privacy and provides a dressing and bath area with double lavatories, skylight and whirlpool tub.

● Embellished with interesting detail, this four-bedroom, two-story home offers an alternative to the ordinary. The covered veranda welcomes all to a marvelous floor plan. Thoughtful amenities include a dining room with added hutch space, a bay window in the parlor, a large gathering room with fireplace and plenty of windows and a featured-filled kitchen. The luxurious master bedroom has a vaulted ceiling and pampering bath with whirlpool, double lavatories and two closets. Three secondary bedrooms share a full bath with double lavatories.

Design EE2970 First Floor: 1,538 square feet
 Second Floor: 1,526 square feet; Third Floor: 658 square feet
 Total: 3,722 square feet

● A porch, is a porch, is a porch. But, when it wraps around to a side, or even two sides, of the house, we have called it a veranda. This charming Victorian features a covered outdoor living area on all four sides! It even ends at a screened porch which features a sun deck above. This interesting plan offers three floors of livability. And what livability it is! Plenty of formal and informal living facilities to go along with the potential of five bedrooms. The master suite is just that. It is adjacent to an interesting sitting room. It has a sun deck and excellent bath/personal care facilities. The third floor will make a wonderful haven for the family's student members.

● Victorian houses are well known for their orientation on narrow building sites. And when this occurs nothing is lost to captivating exterior styling. This house is but 38 feet wide. Its narrow width belies the tremendous amount of livability found inside. And, of course, the ubiquitous porch/veranda contributes mightily to style as well as livability. The efficient, U-shape kitchen is flanked by the informal breakfast room and formal dining room. The rear living area is spacious and functions in an exciting manner with the outdoor areas. Bonus recreational, hobby and storage space is offered by the basement and the attic.

● What could beat the charm of a turreted Victorian with covered porches to the front, side and rear? This delicately detailed exterior houses an outstanding family oriented floor plan. Projecting bays make their contribution to the exterior styling. In addition, they provide an extra measure of livability

to the living, dining and family rooms, plus two of the bedrooms. The efficient kitchen, with its island cooking station, functions well with the dining and family rooms. A study provides a quiet first floor haven for the family's less active pursuits. Upstairs there are three big bedrooms and a fine master bath.

The third floor provides a guest suite and huge bulk storage area (make it a cedar closet if you wish). This house has a basement for the development of further recreational and storage facilities. Don't miss the two fireplaces, large laundry and attached two-car garage. A great investment.

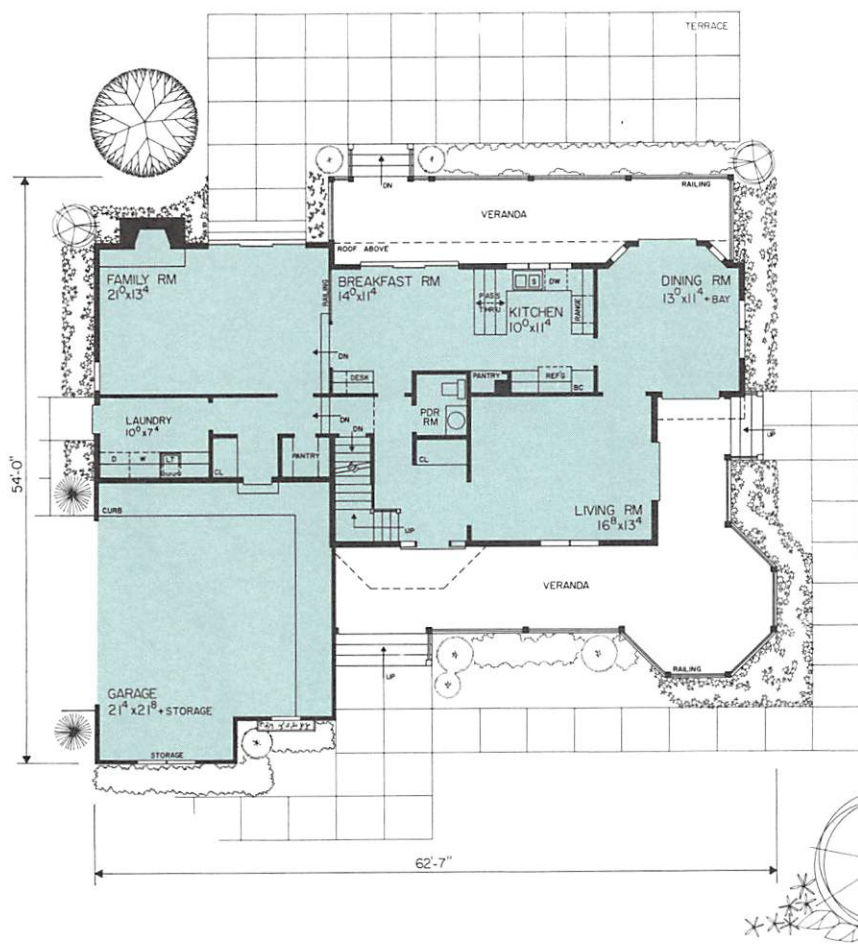

Design EE3309

First Floor: 1,375 square feet

Second Floor: 1,016 square feet

● A magnificent, finely wrought covered porch wraps around this impressive Victorian estate home. The gracious two-story foyer provides a direct view past the stylish bannister and into the great room with large central fireplace. To the left of the foyer is a bookshelf-lined library and to the right is a dramatic, octagonal-shaped dining room. The island cooktop completes a convenient work triangle in the kitchen, and a pass-through connects this room with the Victorian-style morning room. A butler's pantry, walk-in closet, and broom closet offer plenty of storage space. A luxurious master suite is located on the first floor and opens to the rear covered porch. A through-fireplace warms the bedroom, sitting room, and dressing room, which includes His and Hers walk-in closets. The step-up whirlpool tub is an elegant focal point to the master bath. Four uniquely designed bedrooms, three full baths, and a restful lounge with fireplace are located on the second floor. Who says you can't combine the absolute best of today's amenities with the quaint styling and comfortable warmth of the Victorian past!

Southern Colonial, Georgian & Plantation Styles

All the grandeur of the South comes through in our selection of styles ranging from Southern Colonial and Georgian to the distinguished Plantation style. Similarities of these houses include the use of brick — oftentimes to ward off the evils of rain on wood—columns and pedimented structures.

The Southern Colonial, for example, displays symmetry with a covered stoop flanked by equal sets of windows. Quoins enhance the exterior as in Design EE9364. This house features a family room wing on the left to balance a modern garage wing on the right. The floor plan remains true to order.

To expand on such stateliness, EE3303 utilizes a roof overhang supported by six columns to create a portico. Balance reigns, again, through matching wings on both sides of the main house. In this design, the wings function in truly modern terms with one for the family vehicles and one to accommodate the master bedroom suite.

Symmetry continues to be the watchword in Georgian variations, with a central structure often flanked by wings. However, these wings tend to carry more living space with one wing carrying all sleeping quarters and another, utility areas (usually coupled with the garage). Brick continues as the primary exterior material, especially appropriate for the South. As displayed in Design EE2693, Georgians are less vertical and have a lower pitched roof. Four chimneys dominate the exterior elevation and are placed in an orderly fashion. Entryways remain a focus with columns and pediments introducing a very livable interior.

Of all the styles prominent in the South, perhaps the most distinguished is the Southern Plantation home. Steeped in Southern history, this style exhibits classic architectural proportions. Because plantations were often set in the moist, fertile areas of the South — especially Louisiana — concern over water tables came into play. As a result, houses incorporated a raised basement and a story or a story-and-a-half for living. This is exemplified in Design EE3505. It also shows how today's adaptations still sport verandas that stretch around the house for enjoying cool breezes — or any breezes at all. And because plantation living meant wealth, this design and others in this section still offer large proportions and embellishments such as the grand and picturesque columns that help define the style.

This section offers all this and more — including historical homes, with modern interpretations, such as Jefferson's Poplar Forest home, Design EE3509. All in all, the spirit of the South couldn't be more alive than in these homes!

Design EE2693

Square Footage: 3,462

● This elegant Georgian manor is reminiscent of historic Rose Hill, built 1818 in Lexington, Kentucky. It is typical of the classic manors with Greek Revival features built in Kentucky as the 19th Century dawned. Note the classical portico of four Ionic columns plus the fine proportions. Also noteworthy is the updated interior, highlighted by a large country kitchen with fireplace and an efficient work center that includes an island cooktop. The country kitchen leads directly into a front formal dining room, just off the foyer. On the other side of the foyer is a front living room. A large library is located in the back of the house. It features built-in bookcases plus a fireplace, one of four fireplaces.

● This formal two-story recalls a Louisiana plantation house, Land's End, built in 1857. The Ionic columns of the front porch and the pediment gable echo the Greek Revival style. Highlighting the interior is the bright and cheerful spaciousness of the informal family room area. It features a wall of glass stretching to the second story sloping ceiling. Enhancing the drama of this area is the adjacent glass area of the breakfast room. Note the "His/Her" areas of the master bedroom.

Design EE3505

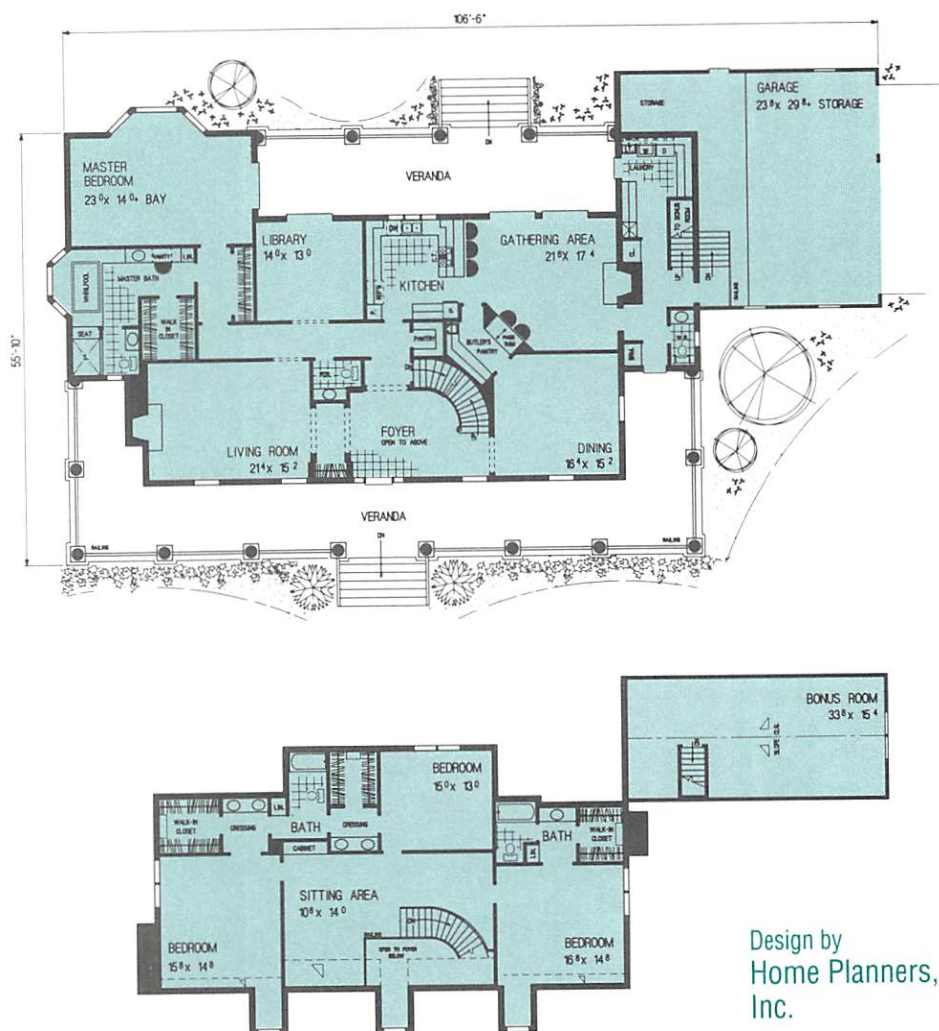

First Floor: 2,899 square feet

Second Floor: 1,519 square feet

Total: 4,418 square feet

Bonus Room: 540 square feet

● A sweeping veranda with tapered columns supports the low-pitched roof and its delicately detailed cornice work. The wood railing effectively complements the lattice-work below. Horizontal siding and double-hung windows with muntins and shutters enhance the historic appeal of the 1½-story home. Inside, the spacious central foyer has a high ceiling and a dramatic, curving staircase to the second floor. Two formal areas flank the foyer and include the living room to the left and the dining room to the right. The U-shaped kitchen easily services the later through a butler's pantry. A library and gathering room flank the kitchen and will delight the family. Sleeping accommodations excel with spacious master suite. Here, a private bath and two closets—one a walk-in—guarantee satisfaction. At the top of the dramatic staircase to the second floor is a generous sitting area which looks down on the foyer. Three bedrooms are directly accessible from this area. A bonus room further enhances this fabulous family home.

Design by
Home Planners,

Design EE2683

First Floor: 2,126 square feet

Second Floor: 1,882 square feet

Total: 4,008 square feet

● This historical Georgian home has its roots in the 18th-Century. Dignified symmetry is a hallmark of both front and rear elevations. The elegant gathering room, three steps down from the rest of the house, has ample space for entertaining on a grand scale. It fills an entire wing and is dead-ended so that traffic does not pass through it. Guests and family alike will enjoy the two rooms flanking the foyer, the study and formal dining room. Each of these rooms will have a fireplace as its highlight. The breakfast room, kitchen, powder room and laundry are arranged for maximum efficiency. This area will always have that desired light and airy atmosphere with the sliding glass door and the triple window over the kitchen sink. The second floor houses the family bedrooms. Take special note of the spacious master bedroom suite. It has a deluxe bath, fireplace and sunken lounge with dressing room and walk-in closet.

First Floor: 2,349 square feet

Second Floor: 1,918 square feet

Total: 4,267 square feet

● This is truly a classic design. Some of the exterior highlights of this two-story include the pediment gable with cornice work and dentils, the beautifully proportioned columns, the front door detailing and the window treatment. Behind the facade of this design is an equally elegant interior. Imagine greeting your guests in the large receiving hall. It is graced by two curving staircases and opens to the formal living and dining rooms. Beyond the living room is the study. It has access to the rear terrace. Those large, informal occasions for family get-togethers or entertaining will be enjoyed in the spacious gathering room. It has a centered fireplace flanked by windows on each side, access to the terrace and a wet bar. The work center is efficient: a kitchen with island cooktop, breakfast room, washroom, laundry and service entrance. The second floor also is outstanding. Three family bedrooms and two full baths are joined by the feature-filled master bedroom suite.

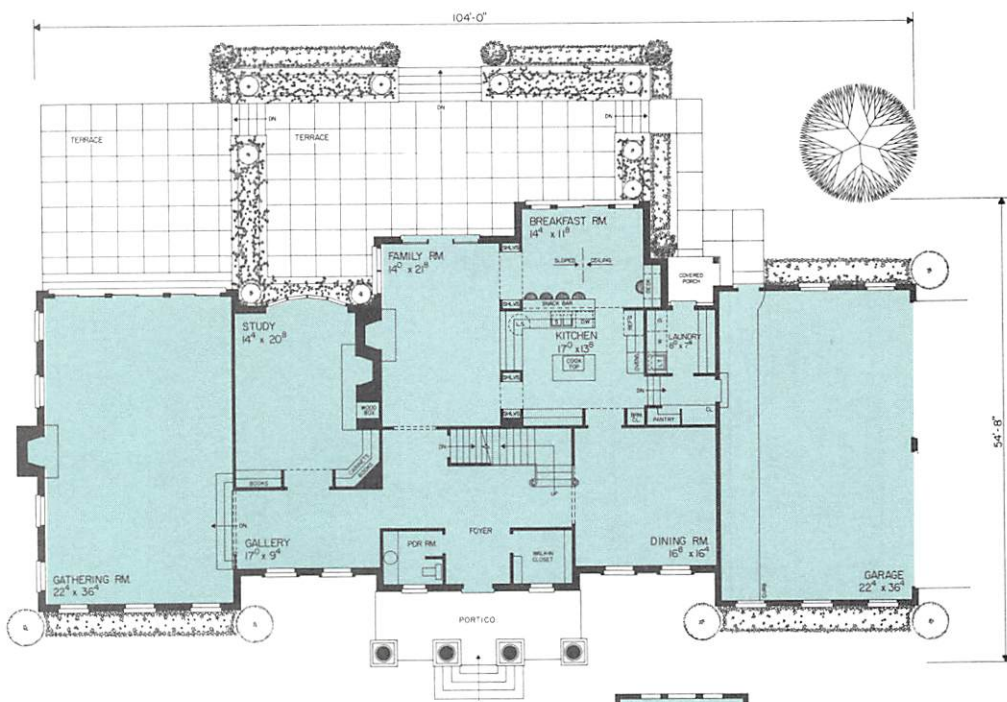

Design EE2984

First Floor: 3,116 square feet

● Fine family living takes off in this traditional design. Step onto the portico and into the foyer where a graceful drawing room gains attention. It is set a few steps down from the foyer and features a central fireplace and access to a rear garden terrace, thus making elegant entertaining a

cinch. In the family room, another terrace supports outdoor enjoyments. The efficient kitchen features a double sink and a Lazy Susan. Upstairs, three bedrooms include a master bedroom with its own bath. The two secondary bedrooms enjoy the use of a full bath with dual lavatories.

Design EE3508

First Floor: 2,098 square feet

Second Floor: 1,735 square feet

Total: 3,833 square feet

● Make history with this modern version of Louisiana's "Rosedown House." Like its predecessor—built in the 1800s—the modern adaptation exhibits splendid Southern styling, but with today's most sought-after amenities. The formal zone of the house is introduced by a foyer with a graceful, curving staircase. The dining and living rooms flank the foyer—each is highlighted by a fireplace. Off the living room, a library or music room offers comfort with a corner fireplace and a covered porch. This room also accesses the family room where more informal living takes off with a nearby breakfast room, expansive kitchen and rear covered porch. Upstairs, three bedrooms (one with its own bath) and a study (which may convert to an additional bedroom, if desired) include a gracious master suite. It opens with double doors and furthers this romantic feeling with a fireplace. A large dressing room with walk-in closets leads to the luxury bath. Two covered balconies complete the superb livability found in this plan.

● If you're looking to do something a little different for your home-building experience, this adaptation of Jefferson's "Poplar Forest" home may be just the ticket. Originally built in the hills around Lynchburg, Virginia, Poplar Forest served Jefferson as a retreat from the hustle and bustle of a new country. Now, equipped with modern amenities, this home will be your perfect retreat. The entry gives way to a sitting or receiving area on the left and a library on the right. Fireplaces adorn all of the major living areas downstairs: drawing room, family room, living room and lounge. Upstairs bedrooms include a master suite with a fireplace and a private luxury bath.

● The covered front porch of this home warmly welcomes family and visitors. To the right of the foyer is a versatile option room. On the other side is the formal dining room, located just across from the open great room with its skylights, French doors and fireplace—which also opens into the breakfast room. The kitchen, with its bay window, includes a cooking island/breakfast bar. Adjacent to the breakfast room is the sun room. At the rear of the main level is the master suite, which features a decorative tray ceiling and a lavish bath loaded with features. Just off the bedroom is a private deck. On the second level, three additional bedrooms and two baths are found. This home is designed with a basement foundation.

Atlanta Classic & European Styles

When speaking of Atlanta, genteel living is a given. One of the South's belle cities, Atlanta exhibits a meshing and absorption of housing styles, especially those of European descent. Its houses sport great curb appeal and range from traditional clapboards to stuccoed French manors.

A true Atlanta Classic, the French-inspired Design EE9805 exudes elegance with a brick exterior, a highly pitched roof and a front covered porch with columns and arches. Dormer windows provide airiness to the interior as well as expansive views of the city and surrounding country.

Appealing, with more of a country flavor, Design EE9803 speaks to a quiet lifestyle. A covered porch, perfect for thoughtful reflection, introduces a floor plan that reaps satisfaction. A parlor provides the perfect spot for moving conversations from the porch to the indoors.

Like much of the South, Atlanta draws on many characteristics of European architecture. Warmer climes encourage the building of many stuccoed and sunny designs. Palladian windows and rear terraces offer further appeal and enhance indoor/outdoor livability. Heightened roof lines give way to better air circulation within the homes.

With Norman roots, Design EE8031 offers many of these features. Familiar columns and arches combine in an impressive entry. These arches harmonize with the famous Palladian design of the windows. Interior spaces rise to two stories to provide a feeling of loftiness as well as to play a part in expelling Southern summer heat.

With designs such as EE3558 and its abundance of windows and pizzazz, this section furnishes a great deal of architectural excitement.

Design EE9918

First Floor: 1,710 square feet

Second Floor: 1,470 square feet

Total: 3,180 square feet

● Many generously sized, shuttered windows flood this stunning home with the clear, warming light of outdoors—captivating with its classic styling. The two-story foyer with its tray ceiling makes a dramatic entrance. To the right, a banquet-sized dining room offers space for a buffet, while the large kitchen allows easy access to the bay-windowed breakfast room. To

the left is a versatile room which can serve as a living room, a study or a guest room. Beyond the foyer is the great room which sports a cheering fireplace flanked by bookcases. An open-railed stairway leads to three bedrooms on the second floor. The exquisite master suite is truly a room to live in, with its stylish tray ceiling and warming fireplace. Its elegance is intensified right down to the bay window and huge walk-in closet with a built-in dressing table. This home is designed with a basement foundation.

● To suit those who favor classic European styling, this English Manor home features a dramatic brick exterior which is further emphasized by the varied roofline and the finial atop the uppermost gable. The main level opens with a two-story foyer and formal rooms on the right. The living room contains a fireplace set in a bay window. The dining room is separated from the living room by a symmetrical column arrangement. The more casual family room is to the rear. For guests, a bedroom and bath are located on the main level. The second floor provides additional bedrooms and baths for family as well as a magnificent master suite. This home is designed with a basement foundation.

● The front of this traditional home is characterized by an arch pattern evident in the windows, doorway and above the columned front porch. Left of the foyer is the formal dining area and a great room with a fireplace and a vaulted ceiling. The large kitchen is conveniently situated with a cooking island, adjoining breakfast room and a keeping room with a corner fireplace. The master suite includes a study with a vaulted ceiling just off the foyer, with a dual-opening fireplace that also warms the bedroom. Beyond the large closets is the bath with dual vanities. Upstairs are three more bedrooms and two baths. This home is designed with a basement foundation.

Total: 3,610 square feet

● This American Country-styled home, with wood siding and shuttered windows, echoes images of the warmth and strength of traditional Southern living. The two-story foyer opens to a dining room and a formal parlor.

Then pass the open rail stairs to the large family room with its fireplace and hearth, flanking bookcases, and squared column supports. The spacious kitchen has a breakfast area which opens to the outside. There is also an "option room" which may serve as the guest quarters with a private bath, a private study or a children's den. Upstairs, the master suite has its own sitting area and an unusual vaulted ceiling. Two other bedrooms share a bath—a fourth has a private bath as well as nostalgic access to the second-floor porch. This home is designed with a basement foundation.

Design EE3569

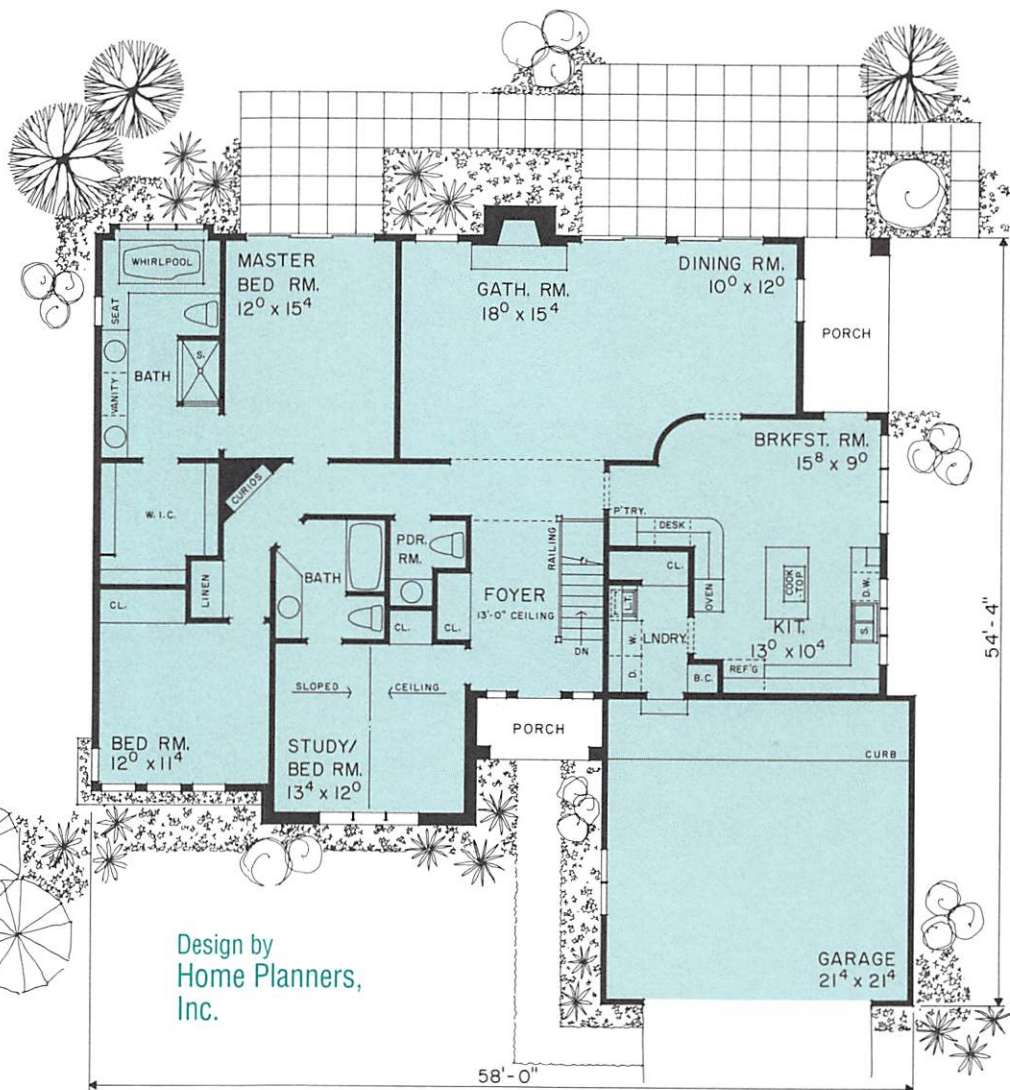

Square Footage: 1,981

● A graceful entry opens this impressive one-story design; the foyer introduces an open gathering room/dining room combination. A front-facing study could easily convert into a bedroom for guests—a full bath is directly accessible from the rear of the room. In the kitchen, such features as an island cooktop and a built-in desk add to livability. A corner bedroom takes advantage of front and side views. The master bedroom accesses the rear terrace and also sports a bath with dual lavatories and a whirlpool. Other special features of the house include multi-pane windows, a warming fireplace, a cozy covered dining porch and a two-car garage. Note the handy storage closet in the laundry area.

● Every detail of this plan speaks of modern design. The exterior is simple yet elegant, while the interior floor plan is thorough and efficient. The formal living and dining rooms are to the left of the foyer, separated by columns. The living room features a wall of windows and a fireplace. The kitchen, with its island cooktop, is adjacent to the large family room with terrace access. A study with additional terrace access completes the first floor. The master bedroom features a balcony and a spectacular bath with a whirlpool tub, a shower with a seat, separate vanities and a walk-in closet. Two family bedrooms share a full bath. Also notice the three-car garage.

● Intricate details make the most of this lovely one-story: high, varied roof lines, circle and half-circle window detailing, multi-pane windows and a solid chimney stack. The floor plan caters to comfortable living. Besides the living room/dining room area to the rear, there is a large conversation area with a fireplace and plenty of windows. The kitchen is separated from living areas by an angled snack-bar counter. A media room to the front of the plan provides space for more private activities. Three bedrooms grace the right side of the plan. The master suite features a tray vaulted ceiling and sliding glass doors to the rear terrace. The dressing area is graced by His and Hers walk-in closets, a double-bowl lavatory and a compartmented commode. The shower area is highlighted with glass block and is sunken down one step. A garden whirlpool finishes off the area. For information on customizing this design, call 1-800-521-6797, ext. 800.

Total: 4,065 square feet

● The exterior elevation of this home is a tasteful composition of classical details and a beautifully proportioned mansard roof. The details and symmetry in the design gives it a timeless character. The interior of the home, on the other hand, opens up to a plan suited to the entertaining and casual lifestyles of today. Once inside the home, the foyer creates an impressive statement with a circular stair and a view into the study. From the study there is convenient access to the master suite which occupies the right wing of the home. It is complete with a garden tub and a reading alcove separate from the sleeping area. Past the foyer, the plan opens up to an area suitable for easy living and entertainment. Upstairs, the plan features three other large bedrooms. One offers a private bath while the other two have private vanities with shared baths for practical, yet private use. This home is designed with a basement foundation.

● This elegant home has many traditional architectural features that make it a classic. The wrought iron railings which skirt each of the front staircases, lead past expansive shuttered windows to the covered portico. The overdoor transom together with the windows gently light the foyer and formal dining room. Beyond the foyer, the vaulted great room, with its immense central fire-place, provides convenient access to the remainder of the house. Both the breakfast room and the great room are open to the second floor gallery. The functional master suite provides easy passage to all sections of the house, yet still maintains a private retreat with a view to the back. Completing the suite are a bath and a large walk-in closet. The large guest suite with its dormered windows could also serve as an upstairs master suite. The remaining two bedrooms share a common bath, with each having a private vanity and a walk-in closet. This home is designed with a basement foundation.

● Classical brick and limestone accents on this brick home create the appearance of a stately English manor. Rich in detail, the home has a detached garage connected by a covered breezeway to continue the charm and stately grace of the design. Once inside the home, you will find a grand two-story foyer complete with a graceful curved staircase. Adjacent and open to the foyer are a banquet-sized dining room and formal study. A large entertaining living room, a vaulted den and a spacious breakfast room and kitchen make up the first-floor living areas. In the master suite, His and Hers amenities and a private exercise room set the pace. A second or back stair is conveniently located just off the living areas for easy access to the spacious bedrooms upstairs. Each has a private bath and a walk-in closet. This home is designed with a basement foundation.

● The ornamental limestone and stucco detailing and the brick exterior provides much of the eclectic character of this home. The impressive two-story facade and raised front pediment give the home its stately image. Inside, the two-story foyer opens to an adjacent study and dining room. An open rail from the gallery above looks down on the foyer and living room below to give a very open appeal to the formal area of the home. The master suite—with its garden tub bath, large closets, convenient access to the study and sitting room—provides the perfect retreat. The kitchen is uniquely situated in a functional arrangement with the breakfast area and keeping room. All rooms at the rear of the home overlook the patio and back yard. Upstairs, three large bedrooms and an optional guest suite, maid's quarters or bonus room meet the needs of a growing family. This home is designed with a basement foundation.

Design EE9922

Bonus Room: 324 square feet

● Brick details, casement windows and large expanses of glass add an Old World touch of glamour to this gracious two-story home. Inside, asymmetrical shapes create an interesting twist to this functional floor plan. Sunlight floods the two-story foyer which is highlighted by the sweeping curves of the balustrade. For formal occasions, look to the spacious dining room, the inviting study and the vaulted great room. The master suite provides a quiet retreat with access to the study through paneled pocket doors. Luxury abounds in the spacious master bedrooms and sumptuous master bath complete with a relaxing garden tub, dual vanities and a huge walk-in closet. The kitchen, breakfast room and keeping room provide a well-designed family living area. Three private secondary bedrooms with full baths are contained on the second floor. A bonus room is also featured on the second floor, perfect for a children's den. This home is designed with a basement foundation.

● The exterior of this home combines the ambience of the large, front porch with the sophistication of a stucco finish. The angled garage deflects attention and insures that the focus remains on the lovely porch area. On entering the home, a graceful, curved staircase rises through the two-story entry to draw your eye upward. Down three stairs, the living room features a complete window wall overlooking the rear. The kitchen, breakfast room and family room are all open to provide a gathering area for the family. The kitchen is replete with many cabinets, a large work island and a walk-in pantry. The master bedroom is large with a bayed sitting area overlooking the back. The master bath includes all the amenities as well as an enormous His and Hers walk-in closet. Also included on the first floor is a study. Upstairs, the home is completed with three bedrooms and two full baths.

Design EE8031 First Floor: 2,287 square feet
Second Floor: 1,216 square feet; Total: 3,503 square feet

● A European flair distinguishes this lovely stucco home. The colonnade with graceful arches draws attention to the entry of the home and completes this beautiful picture. A two-story foyer, a living room, a dining room and ten-foot ceilings in the balance of the downstairs give this home an expansive feel. The living and dining rooms are entered through arches supported by columns. The detail is repeated above in arched plant ledges. The arch detail continues between the living and dining room, setting a mood of casual elegance. Windows across the back of both of these rooms provide a complete vista to the rear grounds beyond. The kitchen, breakfast area and hearth room are grouped to allow for informal entertaining and family gatherings. The master suite includes a bay sitting area and a His and Hers bath with separate dressing areas. Enormous walk-in closets are perfect for custom built-ins. Upstairs, the home includes three bedrooms, two baths and a large game room.

● The stately elegance of this lovely home is evident from first glance. The front door, flanked by four Ionic columns, welcomes all into the foyer. Upon entering the great room through two square columns, the focus is on a large masonry fireplace. Built-ins are included on one wall for entertainment equipment and books. Moving from the great room, Bedrooms 2 and 3 are located off the hallway. The master suite is located at the rear of the house with a luxury master bath that includes large, walk-in His and Hers closets. On the opposite side of the house, two square columns from the foyer to the dining room mirror the columned great room. The kitchen, equipped with an eating bar, a walk-in pantry and a desk, is well designed for the busy cook. A window located over the sink adds lots of natural light. The breakfast area offers a full view of the back yard with access to a spacious covered porch perfect for screening. A staircase from the kitchen area rises to an expandable second floor. This plan is available with either a crawlspace or slab foundation. Please specify when ordering. This plan is available with either a crawlspace or slab foundation. Please specify when ordering.

● Traditional Southern ambience distinguishes this stately antebellum home. The dining and living rooms open off the foyer and are defined by a gallery of columns with graceful connecting arches. A see-through fireplace serves both the living and family rooms. The kitchen is designed for efficiency with a corner walk-in pantry, a breakfast bar and a sunny corner window above the sink. There is access from all major living areas to a huge covered porch. The master suite includes a luxury bath with a corner tub accented by columns. A large shower with a seat and a curved glass block wall, a vanity area with knee space, two linen cabinets and His and Hers walk-in closets make this a wonderful retreat. Upstairs, Bedrooms 2 and 3 both have access to private balconies on the front of the house. Bedroom 2 has a private bath and walk-in closet. If needed, a game room can easily be added. Please specify crawlspace or slab foundation when ordering.

Tennessee Traditional & Memphis Homes

Rich in traditional charm, the homes in this section fit a variety of building sites in both city and country. And no where is this more exemplified than among the rolling landscapes of Tennessee. Incorporated in these structures: European — specifically French — roof lines and exterior materials such as stucco; Gothic columns; and favorite “all-American” building attributes such as the use of brick, siding and dormer windows. Palladian windows to let in sunlight and cupolas for quaintness further the hill-country feel of these comfortable designs.

Ranch-like in demeanor, EE8063 upholds its Tennessee Style. A combination of brick and siding creates a pleasing exterior offset by a columned porch that facilitates outdoor livability. A Palladian window set in a front-facing gable offers an elegant viewpoint, while dormer windows and a cupola set off a multi-faceted roof line.

An American bungalow — EE9898 — takes off with additional design features: a shingled exterior; a front porch defined by arches; and a French-inspired roof line. A projecting gable with vertical siding provides an extra measure of interest. All in all, this charming design will complement a lush landscape or a neighborhood setting with ease.

Naturally, as seen in previous sections, the farmhouse exhibits universal appeal. This is no more apparent than in this section of Tennessee Traditionals. In Design EE9018 — a French Country adaptation — farmhouse appeal comes through with definite distinction. A highly pitched roof highlights a brick and stucco exterior. Shutters flank multi-pane windows. At the side of the house, columns define an arbor — perfect for enjoying country mornings. Inside, livability takes a very modern turn with everything from built-ins to a divine master bedroom suite.

With all this and more to choose from, let a little bit of Tennessee into your heart and home!

● A traditional brick and siding elevation with a lovely wraparound porch sets the stage for a plan that incorporates features demanded by today's lifestyle. The entry opens to the great room and dining room. The use of square columns to define the areas gives the plan the look and feel of a much larger home. The kitchen features loads of counter space and a large work island. The sink is angled toward the great room and features a 42" pass-through bar

above. Washer, dryer and freezer space are available in the utility room along with cabinets for storage and countertops for work area. The master bedroom includes a walk-in closet with ample space for two. The master bath features all the amenities: a corner whirlpool, a shower and His and Hers vanities. Bedrooms 2 and 3 are located nearby and complete the plan. Please specify slab or crawlspace when ordering.

● This split bedroom plan is loaded with impact at the front door. An angled foyer steps down into the living room and directs the eye to an arched opening flanked with columns. Built-in display shelving on either side gives plenty of room for collectibles or books. Another step down leads to the formal dining room. The kitchen features a breakfast room with a bay window and a coffered ceiling treatment. The family room and kitchen are conveniently grouped with the breakfast room to provide a large area for family gatherings and informal entertaining. The master suite is entered through angled double doors. The eye is drawn to the master bath visible through French doors. Columns mounted on pedestals flank the entry. Inside, a luxury bath awaits with a whirlpool tub as the centerpiece. His and Hers vanities, a shower and two large walk-in closets are standard. On the opposite side of the home two additional bedrooms with large walk-in closets and a roomy bath complete this best-selling plan. Please specify crawlspace or slab foundation when ordering.

● The unsurpassed beauty and style of the English cottage is evident in this home, featuring expansive casement windows with transoms above and a detailed brick chimney. The raised foyer overlooks a living area which contains a two-sided fireplace and cozy corner window seat. The large dining area, surrounded by windows, is ideal for entertaining. The kitchen features a cooking center accented with brick arches. The large master bedroom has a walk-in closet and elegant bath with shower and tub. Upstairs, each bedroom has a built-in desk. A detached two-car garage plan is included with this design.

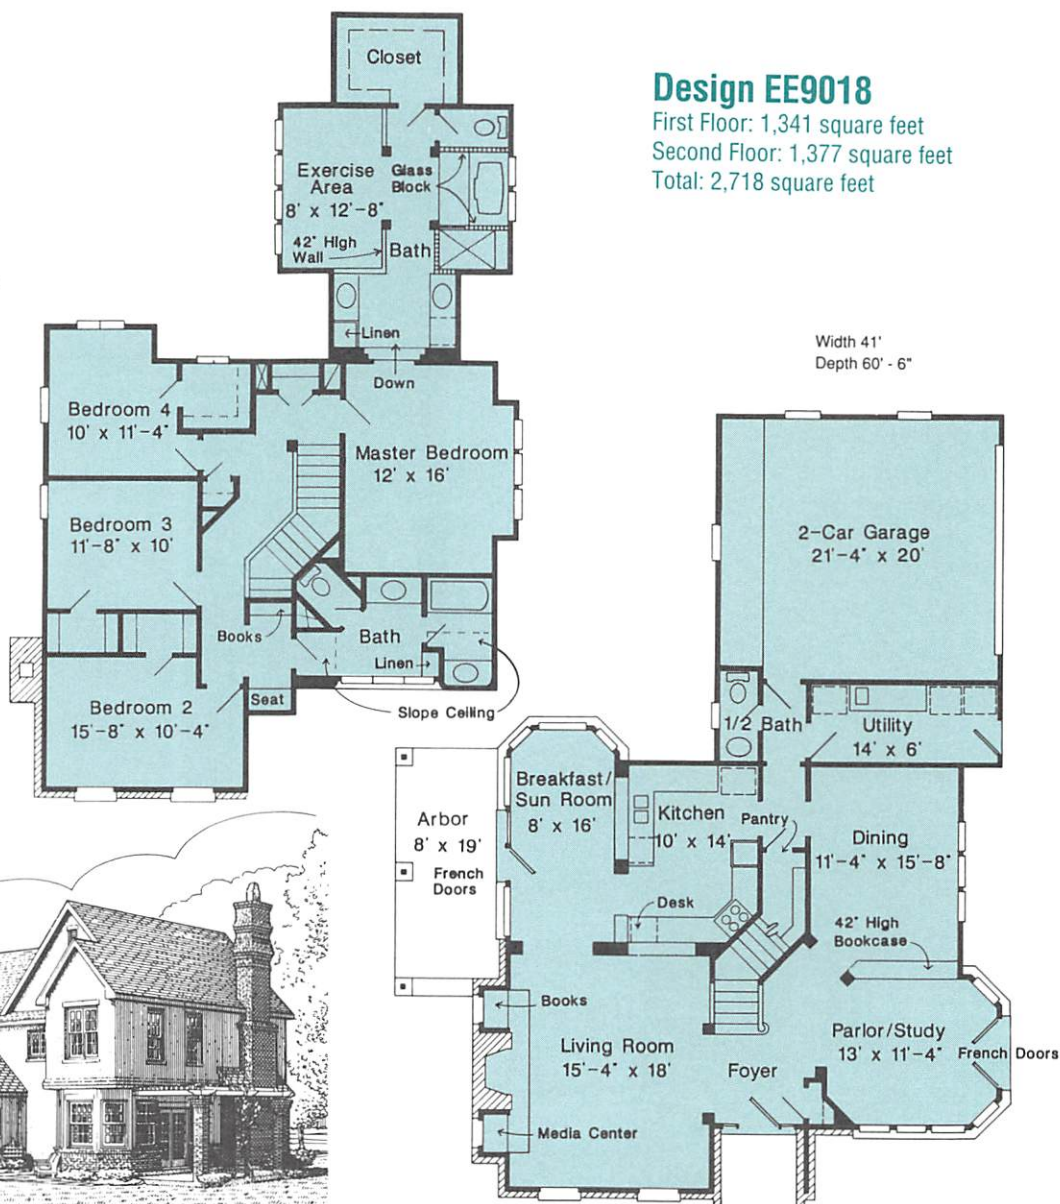

● Brick and stucco combine to create a home reminiscent of the French countryside. A detailed brick archway leads to the front entry with a glass transom above an elegant front door with sidelights. Inside, the living room features a massive fireplace, flanked by built-in bookcases and a media center. The study, with its expansive windows and a forty-two-inch high bookcase is a delightful area for reading or relaxing. Opening directly to the light-filled breakfast/sunroom, the conveniently located kitchen also serves the living area. Adjacent to the two-car garage is a large utility room, with plenty of counter and cabinet space, along with a deep sink. Upstairs, three bedrooms, each with walk-in closets, share a bathroom. The lavish master bedroom steps down to His and Hers dressing areas. The garden tub and shower utilize glass-block walls. In addition to a large walk-in closet, there is also an exercise area with plenty of natural light.

● A wraparound terrace with columns sets the stage for this lovely volume home. The foyer presents a formal dining room to the left and a living room with two sets of French doors and a fireplace to the right. Straight ahead, the casual areas of the home open with a family room that features a media center and a pass-through to the kitchen. A brightly lit breakfast area bumps out from the kitchen and will make mornings that much more delightful. Upstairs, three bedrooms accommodate the family well. A large master suite sports a sitting area, a dressing area and a bath with a walk-in closet and a whirlpool tub.

● Designed for a narrow, golf-course lot, this home mixes wood shingles, brick and a swoop roof to achieve a bungalow look. The garage location can be moved to the right to open up the elevation and make the home appear larger from the curb. Ten-foot ceilings downstairs and the use of glass across the rear make this home feel open and spacious. The large master suite on the left of the home includes an enormous walk-in closet perfect for built-ins. Upstairs, two bedrooms and a bath complete the plan. This plan is available with either a crawlspace or slab foundation. Please specify when ordering.

● This charming cottage-style home featuring a swoop roof is a real charmer. Inside, a two-story foyer opens through a large arch to the living room with a ten-foot coffered ceiling. Another arch defines the dining room. A see-through fireplace is located between the living room and the breakfast area featuring a bay window and a coffered ceiling. A large kitchen, a utility room and a walk-in pantry complete the area. The master bedroom, with ten-foot ceiling, a sitting area and a luxury master bath, is located on the opposite side of the home. Bedroom 2 and Bath 2 are located nearby. Bedrooms 3 and 4 are located upstairs along with an expandable game room.

● Interesting rooflines, multi-level eaves and a two-story double-bay window create a unique cottage farmhouse appearance for this charming home. A combination of columns and stone create a cozy and inviting porch. The grand foyer leads to the formal dining room and large great room, both graced with columns. The great room features a cozy fireplace and opens to the deck through French door. The breakfast room, divided from the great room by an open stair-

case, shares space with an efficient L-shaped kitchen and nearby laundry room, making domestic endeavors easy to accomplish. The right wing is devoted to a sumptuous, amenity-filled master suite with convenient access to the study for after-hours research or quiet reading. The second floor contains three secondary bedrooms and two baths for family and guests. This home is designed with a basement foundation.

Texas Brick & Mansion Styles

In the spirit of new places and open spaces, the home designs from Texas exhibit a whole new fashion. Stunning, grandiose—not unlike the landscape encompassed by the state's borders—the homes of Texas take the best of the South and the “New Frontier” to create a lasting impression.

With facades of brick and mortar, many of these homes recall French styling with an extra amount of charisma. For instance, corner quoins and curved roof lines combine with traditional bay windows and Texas “volume” construction to define a new look. And it doesn't end there as Victorian traditions appear with renewed vigor. All in all, styles reflect a philosophy of uniting old and new — and bigger and better — to arrive at Americana, Texas-style.

The designs in this section take livability from around 1,700 square feet to over 4,000. Whether one-story French-inspired or two-story magnificent mansion, a certain framework exists to guarantee comfort. For example, the prevailing use of brick, a practical building material, creates beautiful exteriors. Also common, open floor plans match open views. In both these instances, Design EE9086 excels. Its entry reveals a free-flowing living pattern. Indoor/outdoor relationships also appear in this design, thus furthering its Southern appeal.

With Southern grace, EE8004 opens with a two-story foyer and a curving staircase. Showcasing Victorian influences, this design also incorporates a turret — made more enchanting by housing two charming bedrooms. A rear porch meets outdoor enthusiasts at both the breakfast and great rooms.

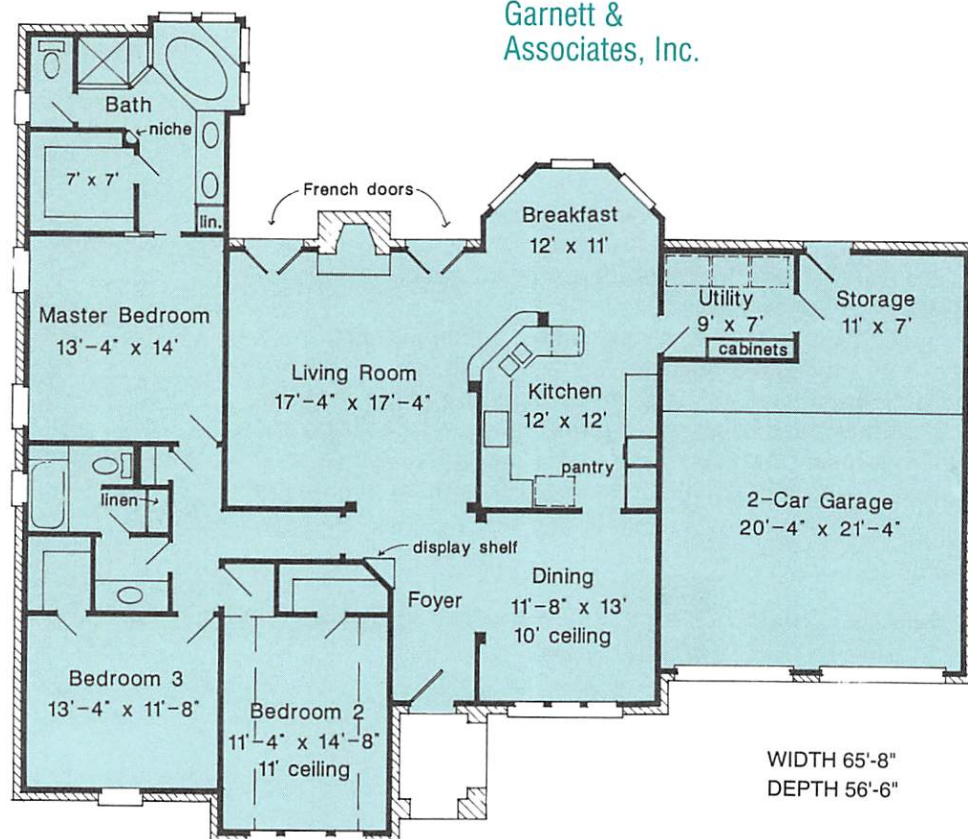

In rare form, Design EE8038 makes a sensational home-building choice. Drawing on French influences with a raised roof and corner quoins, this home delights with its raised porch and circle-head windows. Large proportions give way to an elegant interior that emphasizes integrated living patterns and luxury. As far as Texas traditions go, this home — like many in this section — takes them to new heights.

No matter what you set your sights on, this collection of Texas finery aims to please!

Design EE9088

Square Footage: 1,994

● This charming budget-conscious design provides an abundance of living space. Radiating around the roomy kitchen are the dining room with ten-foot ceiling and living room with French doors and fireplace. A glass-surrounded breakfast area near the kitchen provides space for casual eating. Three bedrooms, all with walk-in closets, dominate the left wing of the home. Bedroom 2 has an eleven-foot sloped ceiling. The master suite features a corner tub and a glass-enclosed shower with seat. Note the large utility room and storage space in the garage.

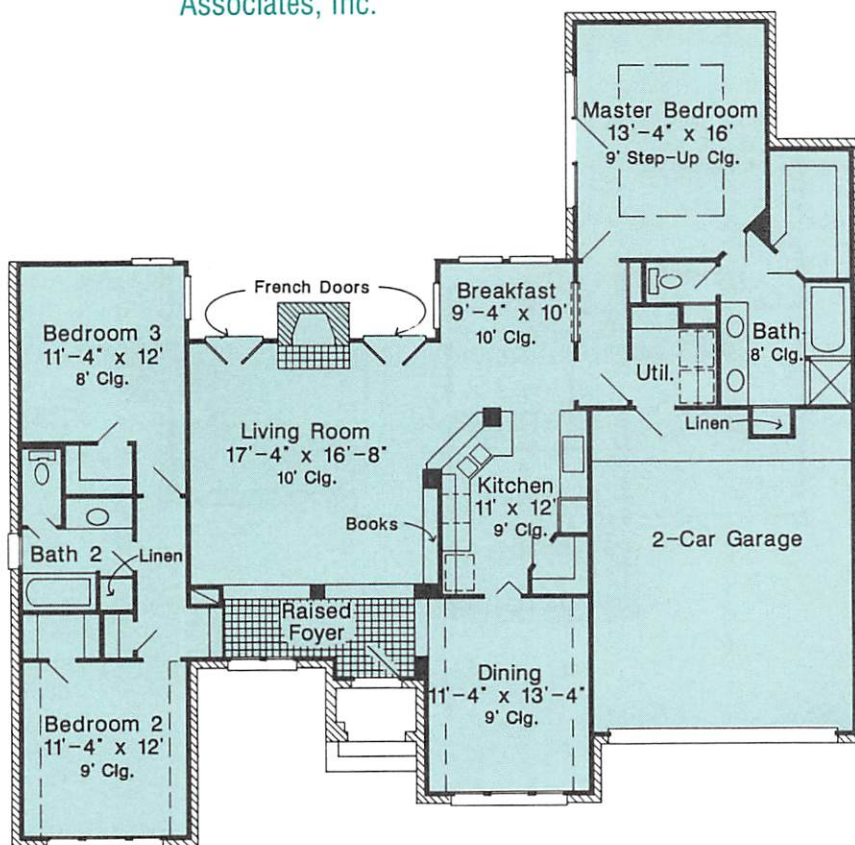

Design EE9089

Square Footage: 1,849

● A wonderful floor plan is found on the interior of this cozy one-story plan. The large living room and conveniently placed dining room both open from the raised foyer. In between is the galley kitchen with huge pantry and attached breakfast area. French doors flanking the fireplace in the living room open to the rear yard. To the right of the plan is the master bedroom with walk-in closet and double lavatories. To the left of the plan are two family bedrooms sharing a full bath in between.

Optional Gameroom: 465 square feet

Total: 3,725 square feet

● Beautiful style reigns both inside and out for this gracious two-story design. The facade was influenced by Tudor homes of the 1930s. The foyer opens to a formal living room with a fireplace and a built-in bookcase. The formal dining room has a sloped ceiling with a balcony above. The kitchen has an island cooktop and shares a fireplace with the bay-windowed breakfast area. The master suite features French doors and a luxurious master bath with a raised area for a whirlpool tub. The second floor holds three secondary bedrooms and an optional gameroom.

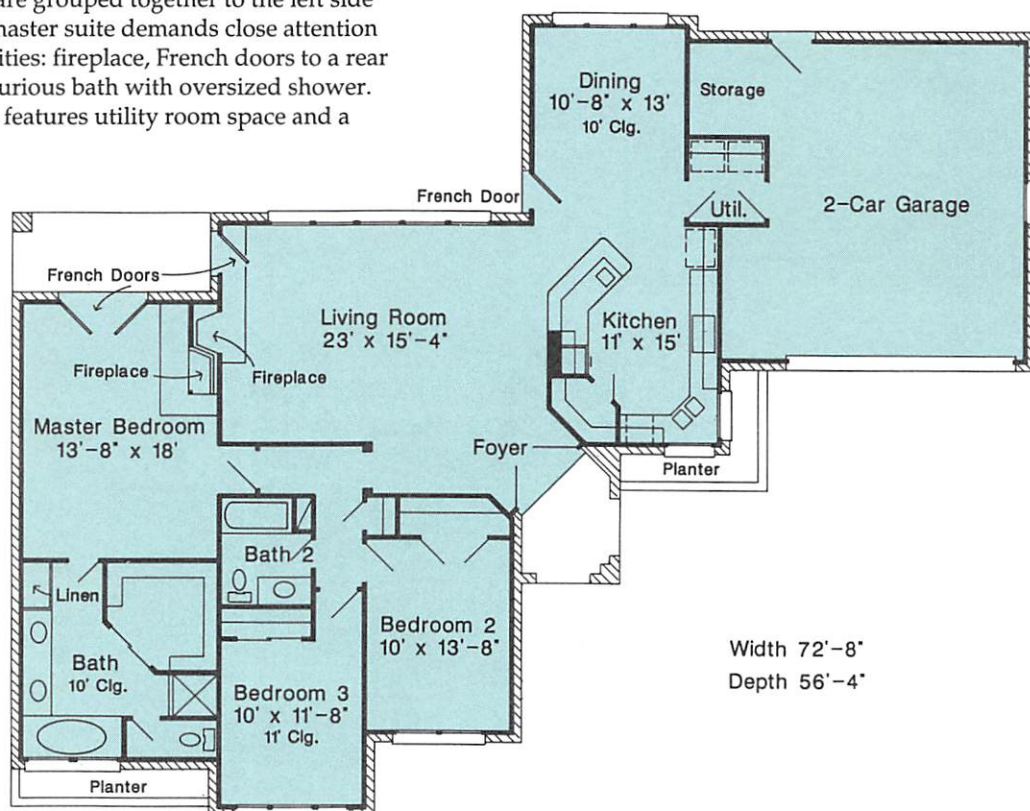

Design EE9027

Square Footage: 1,822

● This is a beautiful one-story plan and one that will adequately serve family needs in a limited amount of space. A central living area with fireplace acts as the hub of the plan, opening up from the front foyer. Close by are the efficient kitchen and dining area. Three bedrooms are grouped together to the left side of the plan. The master suite demands close attention to its many amenities: fireplace, French doors to a rear terrace, and a luxurious bath with oversized shower. A two-car garage features utility room space and a storage area.

Florida, Spanish & Mediterranean Designs

Let the sun shine in with one of the designs in this section; each one will provide a successful home-building experience. With Floridian, Spanish and Mediterranean roots, many — if not all — will complement a variety of building sites. First brought over from the Mediterranean during times of exploration, these homes are now decked out in contemporary fashion, with sleek lines, commodious living patterns and a great deal of indoor/outdoor relationships. These stuccoed beauties feature verandas, patios, lanais and walled gardens. Glorious windows and bright open spaces provide maximum enjoyment of the outdoors from the comfort of the indoors. Family living areas abound with combined kitchen/family or leisure rooms often culminating in open-air areas a step away.

Design EE3475 exhibits the essence of these styles with its earthy facade done in stucco and its tiled roof. Its volume look functions in practical terms, too, by allowing warm air to rise and cool air to circulate through living areas. Privacy walls allow garden areas directly outside windows. In the rear of the house, a covered terrace yields outdoor enjoyment. And true to the style's heritage, this design would work well seaside or hillside.

Upholding Spanish traditions, Design EE9082 sits well on a relatively narrow lot, perfect for today's highly priced — and highly prized — parcels of land. Stucco, a tiled roof and intricate interior spaces function as common denominators of this housing style. To further livability in warm-weather areas, this design incorporates a cool covered porch offset by a tiled courtyard and a fountain.

The homes in this section — each featuring a sunny disposition — will no doubt live up to your highest expectations!

Square Footage: 2,582

● With three bedrooms and a study, there's plenty of room for the whole family in this stunning Floridian home. Living areas display openness and elegance by design. A study opens through double doors and will provide plenty of peace and quiet for more studious pursuits. In the master bedroom, a tiered ceiling, His and Hers closets and a super bath offer the best accommodations. There's even private access to the veranda. The other two bedrooms are located off the kitchen and leisure room. A full bath leads outside to provide perfect pool facilities. In the garage, a third-car stall leaves room for a visitor's car or additional storage.

● Glass surrounds the entry of this appealing stucco home. Arched doorways lead from the formal living and dining rooms to the sleeping zones and the informal living area. The study is situated to the right of the entry and will make a wonderful home office. Ideally suited for informal entertaining, the gourmet kitchen shares space with a sunny breakfast nook and a spacious leisure room which offers access to the rear grounds and a covered veranda. The leisure room provides optional space for a fireplace and entertainment center. The master suite sports two closets: an oversized walk-in closet and a smaller closet nearby. Treat yourself to a relaxing soak in the garden tub or enter the private garden through an adjacent door. A separate shower, dual vanities and a compartmented toilet complete the master sleeping quarters. On the opposite side of the plan, two secondary bedrooms share a full bath.

● Make your home-building dreams come true with this Floridian home. With three bedrooms and plenty of living area, you're sure to feel at home. Inside, an expansive living and dining area offer flexible living patterns. Through sliding glass doors, the living room opens to a rear veranda. Here, a grill enhances outdoor dining. The breakfast nook also accesses this area. The kitchen features a large pantry and openness to a family gathering area where a fireplace and built-ins act as enhancements. Two secondary bedrooms include a guest suite with access to a full bath. The master suite, located on the other side of the house, enjoys a luxury bath and a nearby study.

● Classic columns, circle-head windows and a bay-windowed study give this stucco home a wonderful street presence. The foyer leads into the formal living and dining areas. An arched buffet server separates these rooms and contributes an open feeling. The kitchen, nook and leisure room are grouped for informal living. A desk/message center in the island kitchen, art niches in the nook and a fireplace with an entertainment center and shelves add custom touches. Two secondary suites have guest baths and offer full privacy from the master wing. The master suite hosts a private garden area, while the master bath features a walk-in shower that overlooks the garden, and a water closet room with space for books or a television. Large His and Hers walk-in closets complete these private quarters.

● This three-bedroom Southwestern design is enhanced by the use of arched windows and a dramatic arched entrance. An expansive great room features a cathedral ceiling and a fireplace with direct access to the patio and the dining room. An efficient U-shaped kitchen has plenty of counter space and easily serves both the dining and great rooms. A private master suite features a large walk-in closet and skylit bath with double vanity, whirlpool tub, and separate shower. Two additional bedrooms have generous closet space and share a full bath with double vanity.

● This home features interior planning for today's active family. Living areas include a living room with fireplace, a cozy study and family room with wet

bar. Convenient to the kitchen is the formal dining room with attractive bay window overlooking the back yard. The four-bedroom sleeping area con-

tains a sumptuous master suite. Also notice the cheerful flower porch with access from the master suite, living room and dining room.

Design EE3480

Square Footage: 1,845

● The inviting facade of this sun-country home introduces a most livable floor plan. Beyond the grand entry, a comfortable gathering room, with a central fireplace, shares sweeping, open spaces with the dining room. Sliding glass doors lead to a rear terrace. An efficiently patterned kitchen makes use of a large, walk-in pantry and a breakfast room. A snack bar offers a third mealtime eating option. Nearby, a full laundry room rounds out the modern livability of this utilitarian area. Away from the hustle and bustle of the day, the sleeping wing offers a study with a wide opening off the foyer. If desired as a bedroom, the size and location of the doorway could be moved to the bedroom hallway to afford the proper amount of privacy. Note the large closets in both secondary bedrooms. In the master bedroom, look for double closets and a pampering bath with double lavs, a vanity and a whirlpool bath. For information on customizing this design, call 1-800-521-6797, ext. 800.

● This unique one-story plan seems tailor-made for a small family or for empty-nesters. Formal areas are situated well for entertaining—living room to the right and formal dining room to the left. A large family room is found to the rear. It has access to a rear wood deck and is warmed in the cold months by a welcoming hearth. The U-shaped kitchen features an attached morning room for casual meals. It is near the laundry room and a wash room. Bedrooms are split. The master suite sits to the right of the plan and has a walk-in closet and a fine bath. A nearby study has a private porch. Two family bedrooms on the other side of the home share a private bath. For information on customizing this design, call 1-800-521-6797, ext. 800.

Design EE3475

Square Footage: 3,286

● The colorful, tiled hipped roof with varying roof planes and wide overhangs sets off this Spanish design. Projecting gabled roofs create added interest. Meanwhile, the sheltered front entrance is both dramatic and inviting with double doors opening to the central foyer. Here, a long plant shelf serves as a nice introduction. In the sunken living room, a curved, raised-hearth fireplace acts as a focal point. Double glass doors lead to a covered terrace. The U-shaped kitchen is efficient with its island work surface, breakfast bar, pantry and broom closet. An informal nook delights with its projecting bay and high ceiling. This generous, open area extends to include the family room and will cater to many of the family's informal living activities. Opposite the more formal living room is the separate dining room. Its expanse of glass looks out on the garden court. A major floor-planning feature of this design is found in the sleeping arrangements; notice the complete separation of the parents' and children's bedroom facilities. For information on customizing this design, call 1-800-521-6797, ext. 800.

● Reminiscent of the homes built long ago, this Spanish adaptation has many components to draw attention to it. Note the long entry porch leading to an angled foyer flanked by a huge living room with a cathedral ceiling and a dining room with a sloped ceiling. Across the gallery is a long porch with skylights that overlooks the tiled courtyard. The kitchen features plenty of counter space and a large pantry. To the rear, in privacy, is the master bedroom suite. It has a tub area with a raised gazebo ceiling and transom windows. There are also two family bedrooms sharing a full bath with double vanities.

● This grand design caters to outdoor lifestyles with areas that invite visitation. The front entry opens to a beautiful and characteristic Spanish courtyard with a loggia, an arbor and a spa area. The foyer runs the length of the home and leads from open living and dining areas to a convenient kitchen and breakfast nook, then back to the sleeping quarters. The master suite is especially notable with its luxurious bath and ample closet space. Note the many extras in the plan: a fireplace and a media center in the living room and in the master bedroom, a wet bar at the breakfast nook, and an oversized pantry in the kitchen.

Cost to build? See page 232 to order complete cost estimate to build this house in your area!

Coastal, Tidewater & Island Designs

In this section, fanciful living takes flight with homes designed for tropical climes. Though drawing on traditional elements such as shuttered windows, Palladian windows and siding, many of these stuccoed homes lend themselves to a sleek contemporary look. All utilize outdoor spaces effectively; porches and verandas often greet visitors and take them straight through to rear, open-air living centers. Raised roof lines add modern flair and allow warm air to rise up and away from interior spaces.

With unmistakable appeal, designs such as EE9188 extol the virtues of Bungalow style. Appropriate for exclusive beach property — or nearby neighborhood property — this little house packs a powerful punch. Living areas open up right off the front porch and entry. Ample proportions define bedrooms, making visits and year-round living most comfortable.

Along the coasts or along the tidewaters, an “Old Florida” building style makes the most of the surroundings. To escape high waters, main floors lie above the foundation on piles; break-away lattice-door panels underneath hide anything in storage. Interesting entries are abundant and metal roofs further define this unique style. Design EE6615 serves as a good example. Inside, living areas expand to a veranda in the back and a sun deck off one side of the great room. The second-floor master suite opens up to a private deck. In an expanded interpretation, EE6620 offers details such as built-ins and an elevator.

Whether on the Gulf or in the Virgin Islands, and no matter what the temperature or tide, the homes in this section will provide years of comfortable living.

● With wood siding and a wrapping veranda, this three-bedroom home will take on tropical climes with traditional flair. A French door opens to the foyer with a nearby closet. The living room rises with a ten-foot ceiling. French doors here lead to the veranda and open to balmy summer breezes. The dining room shares an open, columned space with the living room as well as the kitchen. A U-shaped layout in the kitchen provides an efficient work space for the resident cook. French doors also open off the dining room and provide passage to a pleasant rear terrace. Each secondary bedroom extends ample closet space while the master bedroom enjoys an enormous walk-in closet. In the master bath, a double-bowl vanity, dressing table and compartmented toilet guarantee modern convenience.

● Clean, contemporary lines set this home apart and make it a stand-out in any location. The metal roof and roof-top cupola rotated on a 45-degree angle add interest. Stunning is the word when the front door opens on this home. Remote control transoms in the cupola open automatically to increase ventilation. The great room, sun room, dining room and kitchen are all adjacent to provide areas for entertaining. Originally designed for a sloping site, the home incorporates multiple levels inside. Additionally, there is access to a series of multi-level outside decks from the dining room, sun room and great room. All these areas have at least one glass wall overlooking the rear. The master bedroom and bath upstairs are bridged by a pipe rail balcony that provides access to a rear outside deck. The master suite includes a huge master closet. Additional storage and closet area is located off the hallway to the office. The open, spacious layout and emphasis on the views to the rear make this home a winner for harbor/marina, golf course, lake or wooded sites.

● Luxury abounds in this Floridian home. Upon entry, a recreation room gains attention. Up the stairs, livability takes off with an open living room, a bayed dining room and a veranda that stretches across the back of the plan. Two bedrooms occupy the right side of this level and share a full hall bath with dual lavs and a separate tub and shower. The master retreat on the upper level pleases with its own library, a morning kitchen, a large walk-in closet and a pampering bath with a double-bowl vanity, a compartmented toilet and bidet, a whirlpool tub and a shower that opens outside. A private deck allows outdoor enjoyments.

Sun-Country Retirement Homes & Vacation Cottages

Thinking of making the move to that much-dreamed-about vacation or retirement home? In true Southern style, the houses in this section help make that move a definite reality. Whether Victorian or Floridian, one or two stories, the livability in these homes remains casual. Split-bedroom arrangements, combined living areas and ample outdoor living space all combine to present floor plans fit for full-scale enjoyment.

As far as living in the sun, Design EE6603 meets, if not exceeds, all expectations. A handsome stucco facade incorporates multi-pane windows, a dramatic entry and a raised roof line. Family and friends will feel right at home inside. For formal dinners and socializing, the living and dining rooms share open spaces. A lanai spans the rear of the house. Other features, such as a combined informal living area and luxurious baths, guarantee a royal retirement cottage, a super second home or a very fine vacation retreat.

The ultimate vacation cottage, Design EE4061 capitalizes on lake-side, mountain-side or curb-side appeal — all with extra measures of charm. A front covered porch echoes Southern traditions and provides the perfect vantage point for enjoying sunsets. Inside, a focal-point fireplace and efficient living patterns promote relaxed lifestyles.

With the fine selection of homes in this section, today is the perfect time to plan for tomorrow's relaxed and recreational lifestyles!

● Two elevations are yours to choose from in this stunning sun country home. An octagonal-shaped dining room with a tray ceiling and living room opening to the lanai make up the formal living areas. Pass through an arched doorway and enter the informal living area comprised of an efficient kitchen, a sunlit breakfast nook and a comfortable leisure room with a fireplace and built-ins to one side. There is access to the lanai here. The far right side of the plan contains two family bedrooms and a full bath. To the far left, is a private master suite with sitting area opening to the lanai. His and Hers walk-in closets, a compartmented toilet, a calming corner tub and a separate shower and a double-bowl vanity complete this pampering suite.

First Floor: 1,163 square feet

Second Floor: 1,077 square feet

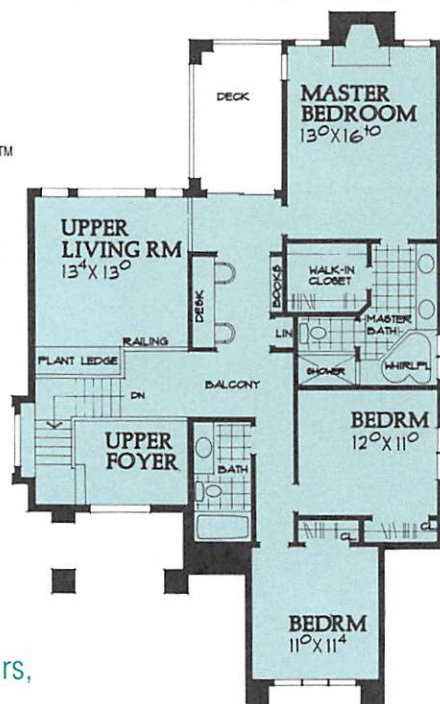

Total: 2,240 square feet

● Fine family living takes off in this grand two-story plan. The tiled foyer leads to a stately living room with sliding glass doors to the back terrace and columns separating it from the dining room. Additional accents include a corner curios niche and access to a covered porch. For casual living, look no further than the family room/breakfast room combination. Even more interesting, the kitchen supplies an island counter in the midst of its accommodating, angled layout. On the second floor, the master bedroom draws attention to itself by offering a fireplace, access to a deck and a spoiling bath. A smart addition, the study niche in the hallway shares the outside deck. Two family bedrooms wrap up the sleeping facilities.

● If you're looking for something a little different from the rest, this dramatic home may end your search. A two-story foyer introduces an open formal area consisting of a volume living room and a dining room separated by columns. The kitchen sits to the rear of the plan and shares space with the breakfast room. Here, a curved wall adds interest—sliding glass doors take you out to a covered porch and a connecting terrace. The family room enjoys access to this terrace while maintaining great indoor livability with its see-through fireplace and volume ceiling. Also on the first floor, the master bedroom offers to its lucky occupants a pampering bath. The sleeping accommodations are complete with three upstairs bedrooms.

● This charming one-story story traditional home greets visitors with a covered porch. A uniquely shaped galley-style kitchen shares a snack bar with the spacious gathering room where a fireplace is the focal point. The dining room has sliding glass doors to the rear terrace as does the master suite. This bedroom area also includes a luxury bath with whirlpool tub and separate dressing room. Two additional bedrooms, one that could double as a study, are located at the front of the home. The two-car garage features a large storage area and can be reached through the service entrance to the home or from the rear terrace. For information on customizing this design, call 1-800-521-6797, ext. 800.

Square Footage: 1,389

● A double dose of charm, this special farmhouse plan offers two elevations in its blueprint package. Though rooflines and porch options are different, the floor plan is basically the same and very livable. A formal living room/dining room combination features a warming fireplace and delightful bay window. The kitchen separates this area from the more casual family room. Three bedrooms include two family bedrooms served by a full, shared bath, and a lovely master suite with its own private bath. The master suite features dual vanities and a large closet. For information on customizing this design, call 1-800-521-6797, ext. 800.

Design EE9256

Square Footage: 1,347

● Though it may appear oversized, this plan is really quite compact and economical. From the ten-foot ceiling in the entry to the spacious great room with fireplace, it has an open feeling. A snack bar and pantry in the kitchen complement the work area. Bright windows light up the entire breakfast area. To the left side of the plan are three bedrooms, two of which share a full bath. The master suite has a boxed window, built-in bookcase and tiered ceiling. The skylit dressing area features a double vanity and there's a whirlpool in the bath.

Square Footage: 1,666

● This delightfully different plan has brick and stucco on the dramatic front elevation, showcased by sleek lines and decorative windows. An inviting entry has a view into the great room and is enhanced by an arched window and plant shelves above. The great room's fireplace is framed by sunny windows with transoms above. The bay-windowed dining room is nestled between the great room and the superb kitchen/breakfast area. Sleeping areas are positioned to buffer noise between the master bedroom and secondary bedrooms. The master suite enjoys a vaulted ceiling, roomy walk-in closet and sunlit master bath with dual lavatories and whirlpool.

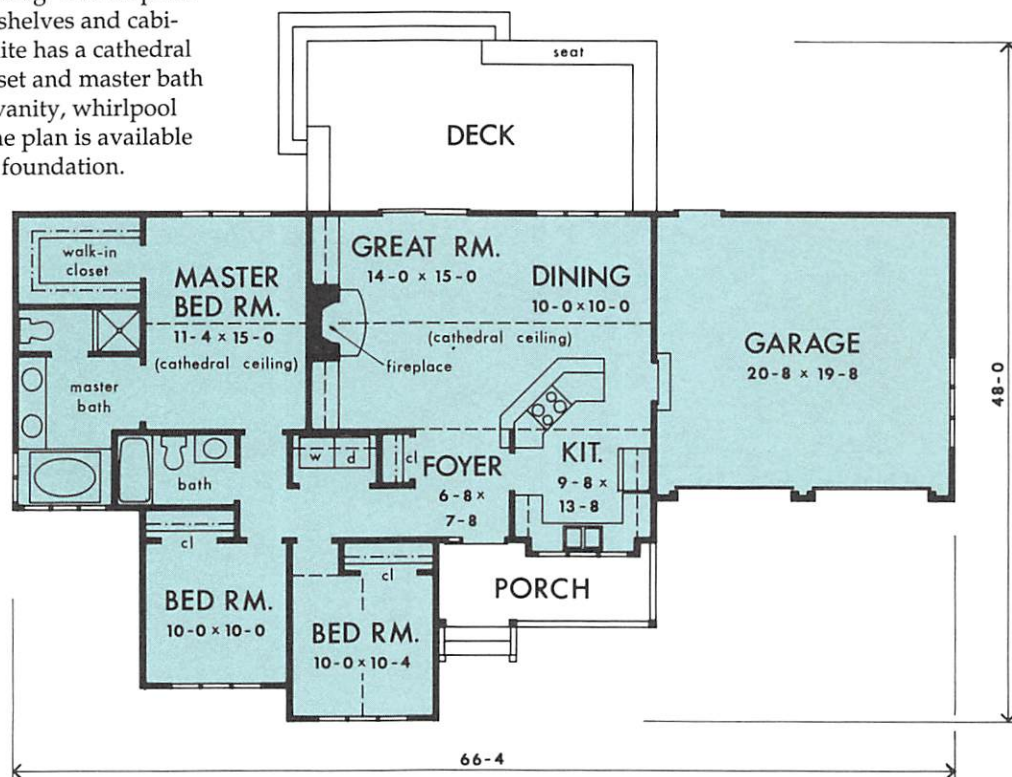

Design by
Design

● This economical plan offers an impressive visual statement with its comfortable and well-proportioned appearance. The entrance foyer leads to all areas of the house. The great room, dining area and kitchen are all open to one another allowing visual interaction. The great room and dining area both have a cathedral ceiling. The fireplace is flanked by book shelves and cabinets. The master suite has a cathedral ceiling, walk-in closet and master bath with double-bowl vanity, whirlpool tub and shower. The plan is available with a crawl-space foundation.

Design EE9620

Square Footage: 1,310

● A multi-paned bay window, dormers, a cupola, a covered porch and a variety of building materials dress up this one-story cottage. The entrance foyer leads to an impressive great room with cathedral ceiling and fireplace. The U-shaped kitchen, adjacent to the dining room, provides an ideal layout for food preparation. An expansive deck offers shelter while admitting cheery sunlight through skylights. A luxurious master bedroom located to the rear of the house takes advantage of the deck area and is assured privacy from two other bedrooms at the front of the house. These family bedrooms share a full bath.

Design EE9726

Square Footage: 1,498

● This charming one-story home utilizes multi-pane windows, columns, dormers and a covered porch to offer a welcoming front exterior. Inside, the great room with a dramatic cathedral ceiling commands attention; the kitchen and breakfast room are just beyond a set of columns. The tiered ceiling dining room presents a delightfully formal atmosphere for dinner parties or family gatherings. A tray ceiling in the master bedroom will please, as will a large walk-in closet and a gracious master bath with dual lavatories, a garden tub, and a separate shower. The secondary bedrooms are located at the opposite end of the house for privacy. This plan is available with a crawlspace foundation.

Design by
Donald A.
Gardner,
Architects, Inc.

Design EE9666

First Floor: 1,027 square feet

Second Floor: 580 square feet

Total: 1,607 square feet

● This economical, rustic three-bedroom plan sports a relaxing country image with both front and back covered porches. The openness of the expansive great room to kitchen/dining areas and loft/study areas is reinforced with a shared cathedral ceiling for impressive space. The first level allows for two bedrooms, a full bath and a utility area. The master suite on the second level has a walk-in closet and a master bath with whirlpool tub, shower and double-bowl vanity. The plan is available with a crawl-space foundation.

● This charming farmhouse design will be economical to build and a pleasure to occupy. Like most vacation homes, this design features an open plan. The large living area includes a

living room and dining room and a massive stone fireplace. A partition separates the kitchen from the living room. Also downstairs are a bedroom, full bath, and laundry room. Upstairs

is a spacious sleeping loft overlooking the living room. Don't miss the large front porch — this will be a favorite spot for relaxing.

WIDTH 51'-10"
DEPTH 41'-8"

Design EE8958

First Floor: 980 square feet

Second Floor: 546 square feet

Total: 1,526 square feet

● You'll feel right at home in this traditional-style house. A living room defined by a fireplace, French doors and built-in-bookshelves sets the tone for first-floor livability. A U-shaped kitchen benefits from such features as a pantry and a conveniently accessed dining area. A utility room supplies passage from the garage to the main house. The master bedroom enjoys first-floor frontal views and a compartmented bath. Two more bedrooms, set up-stairs, share a delightful full bath with a linen closet and a window seat. Each bedroom yields a walk-in closet. Also particularly mentionable: the loft with a built-in desk that sits atop the stairs.

Design EE9131

First Floor: 978 square feet

Second Floor: 464 square feet

Total: 1,442 square feet

From the covered front veranda to the second-story Palladian window, this home exudes warmth and grace. Though smaller in square footage, the floor plan offers plenty of room. The living area is complemented by a cozy corner fireplace and is attached to a dining area with French doors to a screened porch and the front veranda. The galley-style kitchen is the central hub of the first floor. A large bedroom on this floor has an attached full bath and serves equally well as guest bedroom or master bedroom. The second floor holds two bedrooms and another full bath. An open balcony area here overlooks the foyer below.

Design by
Larry W.
Garnett &
Associates, Inc.

Design EE9008

First Floor: 1,653 square feet

Second Floor: 613 square feet

Total: 2,266 square feet

While much less elaborate than other Victorian styles, the intersecting roof lines, arch-top windows with shutters, and detailed corner pilasters give this home a casual, yet distinctive appearance. An eight-foot-wide veranda provides plenty of room for outdoor entertaining. Inside, the large foyer opens to the formal dining area. A thirteen-foot raised ceiling with blocked panel trim and crown molding adds interest to the living room. French doors lead to a private library with built-in bookcases and a window seat. The secluded master suite offers a walk-in closet and an elegant bath with garden tub and glass-enclosed shower. Upstairs, the balcony features a built-in bookcase. Two large bedrooms each have walk-in closets and ceilings that slope from six feet to nine feet in height. Plans for a detached garage are included.

Design EE9861

First Floor: 1,960 square feet

Second Floor: 965 square feet

Total: 2,925 square feet

● The facade of this charming home is Americana at its best, with a rocking-chair porch, bay window and dormers above, finished in stone and wood siding and faithfully detailed. A

convenient outdoor entrance to the two-car garage is located to the right of the front porch. The main level features an easy flow, beginning with the dining room to the right of the foyer. A hallway between the foyer and main staircase helps to promote a sense of openness. The great room features a large hearth and French doors to the patio, and leads directly to the

breakfast area and kitchen. Left of the foyer is an attractive study with a large bay window. The master suite, featuring a bay-windowed sitting area and a large master bath completes the main level. On the upper level, Bedroom 2 features a full bath and has three dormer windows overlooking the front lawn. This home is designed with a basement foundation.

When You're Ready To Order . . .

Let Us Show You Our Home Blueprint Package.

Building a home? Planning a home? Our Blueprint Package has nearly everything you need to get the job done right, whether you're working on your own or with help from an architect, designer, builder or subcontractors. Each Blueprint Package is the result of many hours of work by licensed architects or professional designers.

QUALITY

Hundreds of hours of painstaking effort have gone into the development of your blueprint set. Each home has been quality-checked by professionals to insure accuracy and buildability.

VALUE

Because we sell in volume, you can buy professional-quality blueprints at a fraction of their development cost. With our plans, your dream home design costs only a few hundred dollars, not the thousands of dollars that custom architects charge.

SERVICE

Once you've chosen your favorite home plan, you'll receive fast, efficient service whether you choose to mail or fax your order to us or call us toll free at 1-800-521-6797.

SATISFACTION

Our years of service to satisfied home plan buyers provide us the experience and knowledge that guarantee your satisfaction with our product and performance.

ORDER TOLL FREE 1-800-521-6797

After you've looked over our Blueprint Package and Important Extras on the following pages, simply mail the order form on page 237 or call toll free on our Blueprint Hotline: 1-800-521-6797. We're ready and eager to serve you.

Each set of blueprints is an interrelated collection of detail sheets which includes components such as floor plans, interior and exterior elevations, dimensions, cross-sections, diagrams and notations. These sheets show exactly how your house is to be built.

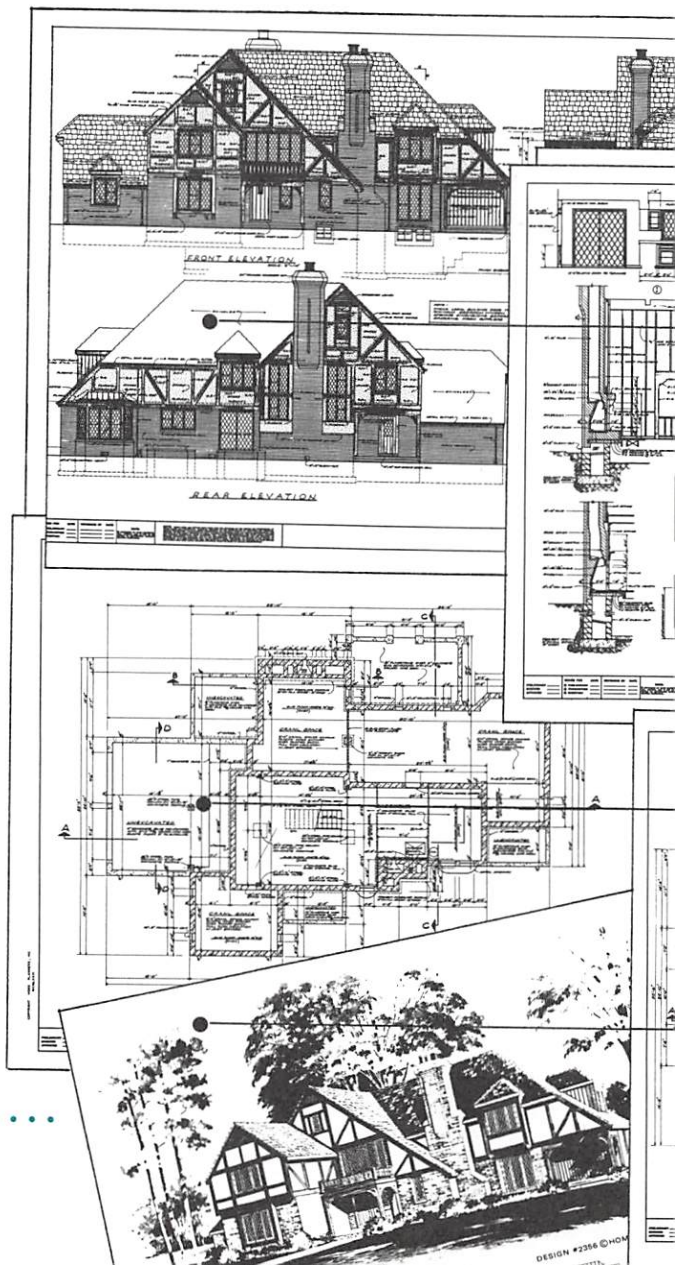

Among the sheets included may be:

Frontal Sheet

This artist's sketch of the exterior of the house gives you an idea of how the house will look when built and landscaped. Large ink-line floor plans show all levels of the house and provide an overview of your new home's livability, as well as a handy reference for deciding on furniture placement.

Foundation Plan

This sheet shows the foundation layout includ-

ing support walls, excavated and unexcavated areas, if any, and foundation notes. If slab construction rather than the basement, the plan shows footings and details for a monolithic slab. This page, or another in the set, may include a sample plot plan for locating your house on a building site.

Detailed Floor Plans

These plans show the layout of each floor of the house. Rooms and interior spaces are carefully dimensioned and keys are given for cross-section details provided later in the plans. The positions of electrical outlets and switches are shown.

House Cross-Sections

Large-scale views show sections or cut-aways of the foundation, interior walls, exterior walls, floors, stairways and roof details. Additional cross-sections may show important changes in

floor, ceiling or roof heights or the relationship of one level to another. Extremely valuable for construction, these sections show exactly how the various parts of the house fit together.

Interior Elevations

These large-scale drawings show the design and placement of kitchen and bathroom cabinets, laundry areas, fireplaces, bookcases and other built-ins. Little "extras," such as mantelpiece and wainscoting drawings, plus moulding sections, provide details that give your home that custom touch.

Exterior Elevations

These drawings show the front, rear and sides of your house and give necessary notes on exterior materials and finishes. Particular attention is given to cornice detail, brick and stone accents or other finish items that make your home unique.

Important Extras To Do The Job Right!

Introducing eight important planning and construction aids developed by our professionals to help you succeed in your home-building project.

MATERIALS LIST

For many of the designs in our portfolio, we offer a customized materials take-off that is invaluable in planning and estimating the cost of your new home. This comprehensive list outlines the quantity, type and size of materials needed to build your house (with the exception of mechanical system items). Included are:

- framing lumber
- roofing and sheet metal
- windows and doors
- exterior sheathing material and trim
- masonry, veneer and fireplace materials
- tile and flooring materials
- kitchen and bath cabinetry
- interior drywall and trim
- rough and finish hardware
- many more items

This handy list helps you or your builder cost out materials and serves as a ready reference sheet when you're compiling bids. It also provides a cross-check against the materials specified by your builder and helps coordinate the substitution of items you may need to meet local codes.

(Note: Because of differing local codes, building methods, and availability of materials, our Materials Lists do not include mechanical materials. To obtain necessary take-offs and recommendations, consult heating, plumbing and electrical contractors. Materials Lists are not sold separately from the Blueprint Package.)

SPECIFICATION OUTLINE

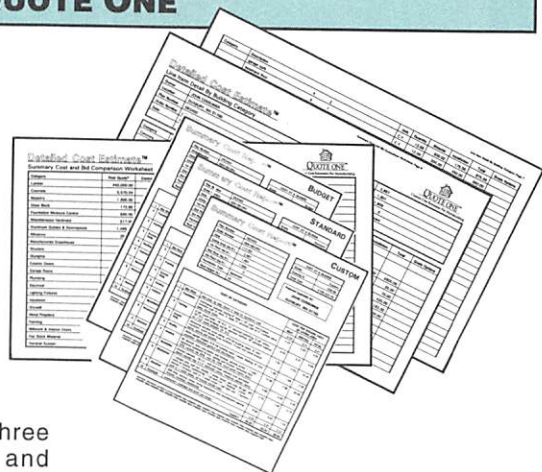

This valuable 16-page document is critical to building your house correctly. Designed to be filled in by you or your builder, this book lists 166 stages or items crucial to the building process. It provides a comprehensive review of the construction process and helps in making choices of materials. When combined with the blueprints, a signed contract, and a schedule, it becomes a legal document and record for the building of your home.

QUOTE ONE™

A new service for estimating the cost of building select Home Planners designs, the Quote One™ system is available in two separate stages: The Summary Cost Report and the Detailed Cost Estimate. The Summary Cost Report shows the total cost per square foot for your chosen home in your zip-code area and then breaks that cost down into ten categories showing the costs for building materials, labor and installation. The total cost for the report (including three grades: Budget, Standard and Custom) is just \$15 for one home; \$25 for two and additional are only \$5. These reports allow you to evaluate your building budget and compare the costs of building a variety of homes in your area.

The Detailed Cost Estimate furnishes an even more detailed report. The material and installation (labor + equipment) cost is shown for each of

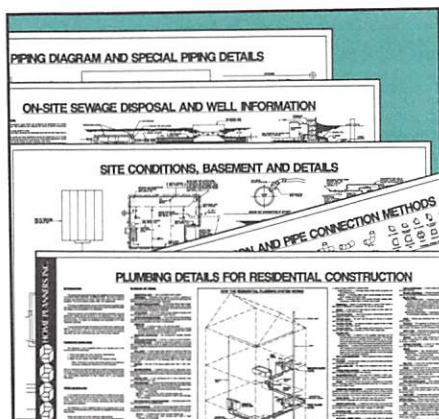

over 1,000 line items provided in the Standard grade. Space is allowed for additional estimates from contractors and subcontractors. This invaluable tool is available for a price of \$100 (\$110 for a Schedule E plan) which includes the price of a materials list which must be purchased at the same time.

To order these invaluable reports, use the order form on page 237 or call 1-800-521-6797.

CONSTRUCTION INFORMATION

If you want to know more about techniques—and deal more confidently with subcontractors—we offer these useful sheets. Each set is an excellent tool that will add to your understanding of these technical subjects.

PLUMBING

The Blueprint Package includes locations for all the plumbing fixtures in your new house, including sinks, lavatories, tubs, showers, toilets, laundry trays and water heaters. However, if you want to know more about the complete plumbing system, these 24x36-inch detail sheets will prove very useful. Prepared to meet requirements of the National Plumbing Code, these six fact-filled sheets give general information on pipe schedules, fittings, sump-pump details, water-softener hookups, septic system details and much more. Color-coded sheets include a glossary of terms.

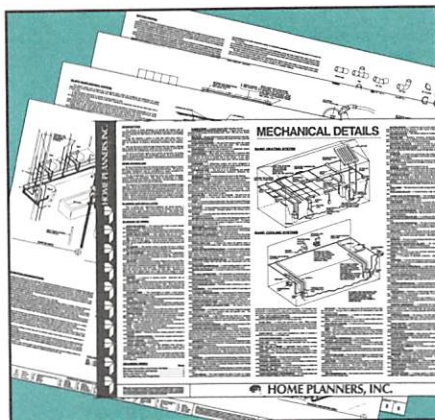

CONSTRUCTION

The Blueprint Package contains everything an experienced builder needs to construct a particular house. However, it doesn't show all the ways that houses can be built, nor does it explain alternate construction methods. To help you understand how your house will be built—and offer additional techniques—this set of drawings depicts the materials and methods used to build foundations, fireplaces, walls, floors and roofs. Where appropriate, the drawings show acceptable alternatives. These six sheets will answer questions for the advanced do-it-yourselfer or home planner.

ELECTRICAL

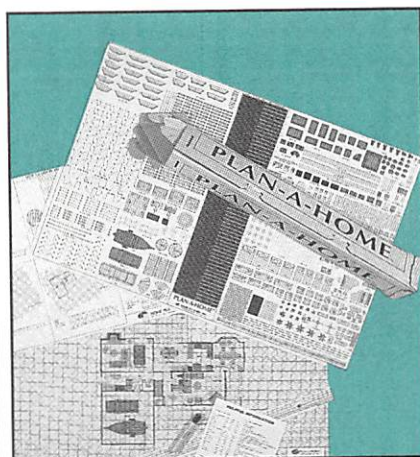

The locations for every electrical switch, plug and outlet are shown in your Blueprint Package. However, these Electrical Details go further to take the mystery out of household electrical systems. Prepared to meet requirements of the National Electrical Code, these comprehensive 24x36-inch drawings come packed with helpful information, including wire sizing, switch-installation schematics, cable-routing details, appliance wattage, door-bell hookups, typical service panel circuitry and much more. Six sheets are bound together and color-coded for easy reference. A glossary of terms is also included.

MECHANICAL

This package contains fundamental principles and useful data that will help you make informed decisions and communicate with subcontractors about heating and cooling systems. The 24x36-inch drawings contain instructions and samples that allow you to make simple load calculations and preliminary sizing and costing analysis. Covered are today's most commonly used systems from heat pumps to solar fuel systems. The package is packed full of illustrations and diagrams to help you visualize components and how they relate to one another.

Plan-A-Home®

Plan-A-Home® is an easy-to-use tool that helps you design a new home, arrange furniture in a new or existing home, or plan a remodeling project. Each package contains:

- **More than 700 reusable peel-off planning symbols** on a self-stick vinyl sheet, including walls, windows, doors, all types of furniture, kitchen components, bath fixtures and many more.
- **A reusable, transparent, 1/4-inch scale planning grid** that matches the scale of actual working drawings (1/4-inch equals 1 foot). This grid provides the basis for house layouts of up to 140x92 feet.
- **Tracing paper** and a protective sheet for copying or transferring your completed plan.
- **A felt-tip pen**, with water-soluble ink that wipes away quickly.

Plan-A-Home® lets you lay out areas as large as a 7,500 square foot, six-bedroom, seven-bath house.

**To Order,
Call Toll Free
1-800-521-6797**

To add these important extras to your Blueprint Package, simply indicate your choices on the order form on page 237 or call us Toll Free 1-800-521-6797 and we'll tell you more about these exciting products.

House Blueprint Price Schedule and Plans Index

These pages contain all the information you need to price your blueprints. In general the larger and more complicated the house, the more it costs to design and thus the higher the price we must charge for the blueprints. Remember, however, that these prices are far less than you would normally pay for the services of a licensed architect or professional designer. Custom home designs and related architectural services often cost thousands of dollars, ranging from 5% to 15% of the cost of construction. By ordering our blueprints you are potentially saving enough money to afford a larger house, or to add those "extra" amenities such as a patio, deck, swimming pool or even an upgraded kitchen or luxurious master suite.

To use the Index below, refer to the design number listed in numerical order (a helpful page reference is also given). Note the price index letter and refer to the House Blueprint Price Schedule at right for the cost of one, four or eight sets of blueprints or the cost of a reproducible sepia. Additional prices are shown for identical and reverse blueprint sets, as well as a very useful Materials List for some of the plans.

Before You Order . . .

Before filling out the coupon at right or calling us on our Toll-Free Blueprint Hotline, you may want to learn more about our services and products. Here's some information you will find helpful.

Quick Turnaround

We process and ship every blueprint order from our office within 48 hours. Because of this quick turnaround, we won't send a formal notice acknowledging receipt of your order.

Our Exchange Policy

Since blueprints are printed in response to your order, we cannot honor requests for refunds. However, we will exchange your entire first order for an equal number of blueprints at a price of \$50 for the first set and \$10 for each additional set; \$70 total exchange fee for 4 sets; \$100 total exchange fee for 8 sets. . . *plus* the difference in cost if exchanging for a design in a higher price bracket or *less* the difference in cost if exchanging for a design in a lower price bracket. One exchange is allowed within a year of purchase date. (Sepias are not exchangeable. No exchanges can be made for the California Engineered Plans since they are tailored to your specific building site.) All sets from the first order must be returned before the exchange can take place. Please add \$10 for postage and handling via ground service; \$20 via 2nd Day Air.

About Reverse Blueprints

If you want to build in reverse of the plan as shown, we will include an extra set of reverse blueprints (mirror image) for an additional fee of \$50. Lettering and dimensions will appear backward. Right-reading reverses of Home Customizer® plans are available. Call 1-800-521-6797, ext. 800 for more details.

Modifying or Customizing Our Plans

With such a great selection of homes, you are bound to find the one that suits you. However, if you need to make alterations to a design that is customizable, you need only order our Customizer® kit or call our Customization representative at 1-800-521-6797, ext. 800 to get you started. We strongly suggest you order sepias if you decide to revise non-Customizable plans significantly.

Architectural and Engineering Seals

Some cities and states are now requiring that a licensed architect or engineer review and "seal" your blueprints prior to building due to local or regional concerns over energy consumption, safety codes, seismic ratings or other factors. For this reason, it may be necessary to talk to a local professional to have your plans reviewed. In some cases, Home Planners can seal your plans through our Customization Service. Call 1-800-521-6797, ext. 800 for more details.

Have You Seen Our Newest Designs?

Home Planners is one of the country's most active home design firms, creating nearly 100 new plans each year. At least 50 of our latest creations are featured in each edition of our New Design Portfolio. You may have received a copy with your latest purchase by mail. If not, or if you purchased this book from a local retailer, just return the coupon below for your FREE copy. Make sure you consider the very latest of what Home Planners has to offer.

Yes! Please send my FREE copy of your latest New Design Portfolio.

Compliance with Local Codes and Regulations

At the time of creation, our plans are drawn to specifications published by the Building Officials and Code Administrators (BOCA) International, Inc.; the Southern Building Code Congress (SBCCI) International, Inc.; the International Conference of Building Officials; or the Council of American Building Officials (CABO). Our plans are designed to meet or exceed national building standards. Some states, counties and municipalities have their own codes, zoning requirements and building regulations. Before building, contact your local building authorities to make sure you comply with local ordinances and codes, including obtaining any necessary permits or inspections as building progresses. In some cases, minor modifications to your plans by your builder, architect or designer may be required to meet local conditions and requirements. Home Planners may be able to make these changes to Home Customizer® plans providing you supply all pertinent information from your local building authorities.

Foundation and Exterior Wall Changes

Most of our plans are drawn with either a full or partial basement foundation. Depending on your specific climate or regional building practices, you may wish to change this basement to a slab or crawlspace. Most professional contractors and builders can easily adapt your plans to alternate foundation types. Likewise, most can easily change 2x4 wall construction to 2x6, or vice versa. For Home Customizer® plans, Home Planners can easily make the changes for you.

How Many Blueprints Do You Need?

A single set of blueprints is sufficient to study a home in greater detail. However, if you are planning to obtain cost estimates from a contractor or subcontractors—or if you are planning to build immediately—you will need more sets. Because additional sets are cheaper when ordered in quantity with the original order, make sure you order enough blueprints to satisfy all requirements. The following checklist will help you determine how many you need:

- _____ Owner
- _____ Builder (generally requires at least three sets; one as a legal document, one to use during inspections, and at least one to give to subcontractors)
- _____ Local Building Department (often requires two sets)
- _____ Mortgage Lender (usually one set for a conventional loan; three sets for FHA or VA loans)
- _____ TOTAL NUMBER OF SETS

Toll Free 1-800-521-6797

Normal Office Hours:
8:00 a.m. to 8:00 p.m. Eastern Time
Monday through Friday

Our staff will gladly answer any questions during normal office hours. Our answering service can place orders after hours or on weekends.

If we receive your order by 4:00 p.m. Eastern Time, Monday through Friday, we'll process it and ship within 48 hours. When ordering by phone, please have your charge card ready. We'll also ask you for the Order Form Key Number at the bottom of the coupon.

For Customization orders call 1-800-521-6797, ext. 800.

By FAX: Copy the Order Form on the next page and send it on our FAX line: 1-800-224-6699 or 1-602-297-9937.

Canadian Customers

Order Toll-Free 1-800-561-4169

For faster service and plans that are modified for building in Canada, customers may now call in orders directly to our Canadian supplier of plans and charge the purchase to a charge card. Or, you may complete the order form at right, adding 30% to all prices and mail in Canadian funds to:

The Plan Centre 20 Cedar Street North
Kitchener, Ontario N2H 2W8

By FAX: Copy the Order Form at right and send it via our Canadian FAX line: 1-519-743-1282.

The Home Customizer®

Many of the plans in this book are customizable through our Home Customizer® service. Look for this symbol  on the pages of home designs. It indicates that the plan on that page is part of The Home Customizer® service.

Some changes to customizable plans that can be made include:

- exterior elevation changes
- kitchen and bath modifications
- roof, wall and foundation changes
- room additions
- and much more!

If the plan you have chosen to build is one of our customizable homes, you can easily order the Home Customizer® kit to start on the path to making your alterations. The kit, priced at only \$29.95, may be ordered at the same time you order your blueprint package by calling our toll-free number or using the order blank at right. Or you can wait until you receive your blueprints, spend some time studying them and then order the kit by phone, FAX or mail. If you then decide to proceed with the customizing service, the \$29.95 price of the kit will be refunded to you after your customization order is received.

The Home Customizer® kit includes:

- instruction book with examples
- architectural scale
- clear acetate work film
- erasable red marker
- removable correction tape
- ¼" scale furniture cutouts
- 1 set of Customizable Drawings with floor plans and elevations

The service is easy, fast and *affordable*. Because we know and work with our plans and have them available on state-of-the-art computer systems, we can make the changes efficiently at prices much lower than those charged by normal architectural or drafting services. In addition, you'll be getting custom changes directly from Home Planners—the company whose dedication to excellence and long-standing professional experience are well recognized in the industry.

Call now to learn more about how simple it can be to have the *custom home* you've always wanted.

California Customers!!

For our customers in California, we now offer California Engineered Plans (CEP) and California Stock Plans (CSP) to help in meeting the strict California building codes. Check Plan Index for homes that are available through this new service or call 1-800-521-6797 for more information about the availability of the service and prices.

Design EE9621 p.6

OVER 3 MILLION BLUEPRINTS SOLD

"We instructed our builder to follow the plans including all of the many details which make this house so elegant... Our home is a fine example of the results one can achieve by purchasing and following the plans which you offer... Everyone who has seen it has assured us that it belongs in 'a picture book.' I truly mean it when I say that my home 'is a DREAM HOUSE.'"

S.P.
Anderson, SC

"We have had a steady stream of visitors, many of whom tell us this is the most beautiful home they've seen. Everyone is amazed at the layout and remarks on how unique it is. Our real estate attorney, who is a Chicago dweller and who deals with highly valued properties, told me this is the only suburban home he has seen that he would want to live in."

W. & P.S.
Flossmoor, IL

"Your blueprints saved us a great deal of money. I acted as the general contractor and we did a lot of the work ourselves. We probably built it for half the cost! We are thinking about more plans for another home. I purchased a competitor's book but my husband wants only your plans!"

K.M.
Grovetown, GA

"We are very happy with the product of our efforts. The neighbors and passersby appreciate what we have created. We have had many people stop by to discuss our house and kindly praise it as being the nicest house in our area of new construction. We have even had one person stop and make us an unsolicited offer to buy the house for much more than we have invested in it."

K. & L.S.
Bolingbrook, IL

"The traffic going past our house is unbelievable. On several occasions, we have heard that it is the 'prettiest house in Batvia.' Also, when meeting someone new and mentioning what street we live on, quite often we're told, 'Oh, you're the one in the yellow house with the wrap-around porch! I love it!'"

A.W.
Batvia, NY

"I have been involved in the building trades my entire life... Since building our home we have built two other homes for other families. Their plans from local professional architects were not nearly as good as yours. For that reason we are ordering additional plan books from you."

T.F.
Kingston, WA

"The blueprints we received from you were of excellent quality and provided us with exactly what we needed to get our successful home-building project underway. We appreciate your invaluable role in our home-building effort."

T.A.
Concord, TN
